MATRIXIQ · SOP PROGRAMME

Coverage Matrix & Delivery Notes

What the six SOPs cover, what could not be verified, and where the Feature Reference and the application disagree.

COMPANION DOCUMENT — NOT ONE OF THE SIX SOPS

Accompanies	The six MatrixIQ department SOPs, version 1.0
Purpose	Coverage matrix, unverified-detail register, discrepancy log, scope summaries
Version	1.0
Preparation date	27 October 2026
Sources	*MatrixIQ Feature Reference* (13 pages) and the MatrixIQ application, verified 27 October 2026
Classification	Internal Use

This document is the audit trail for the SOP set. It records exactly what was covered, what was deliberately left flagged rather than assumed, and every point at which the Feature Reference and the live application were found to differ.

Contents

1	The six documents at a glance	3
2	Scope summary of each document	4
3	Coverage matrix — in-scope submodules	6
4	Coverage matrix — cross-module workflows	8
5	Reference submodules outside the six SOPs	9
6	Discrepancies between the Feature Reference and the application	10
7	Register of details that could not be verified	12
8	Quality assurance performed	14

01 The six documents at a glance

Document	Pages	Classification	Primary audience
MatrixIQ — Accounts Module SOP	36	Internal Use	Accounts staff and the Accounts department manager
MatrixIQ — Administration Module SOP	46	Internal Use — restricted	Super Admin and Admin account holders
MatrixIQ — HR Module SOP	42	Internal — Confidential	HR and Administration staff; every employee for the submission procedures
MatrixIQ — Marketing Module SOP	36	Internal Use	Marketing team, requesters from any department, technical reviewers
MatrixIQ — Operations Module SOP	40	Internal Use	Back Office staff and the technical support desk
MatrixIQ — Partner Portal SOP	38	**For channel partners**	Channel partners, distributors, dealers and their portal users

Total 238 pages. Every document carries a cover page, a clickable table of contents, running headers and footers, and the same fourteen-section structure.

02 Scope summary of each document

2.1 Accounts Module SOP

Covers. The Payments module end to end — the Payment Queue, Payment History and Reimbursement Report tabs; reviewing a payment and opening its original request; marking as paid with the per-source preconditions; placing and lifting holds; filtering and CSV export; how the target date is computed and how the queue is ordered. Plus the Audit Log, including its restriction to Super Admin and Admin.

Also covers, as context. The Accounts stage of five upstream chains — reimbursement, travel, bill of materials, admin expenses and office operation expenses — and a comparison of Billing against the payment queue.

Excludes. Bank operations, statutory filing, tax computation, and the creation of the records that become payments.

2.2 Administration Module SOP

Covers. All eleven configuration submodules: User Management including bulk import and employee exit, Role Management, Department Master, Module Manager, Custom Module Builder, Products, Product Catalog, Application Settings, Meta Lead Integration, Daily Report Configuration and the Audit Log. For each: what it controls elsewhere in the platform, how to change it safely, and what cannot be undone.

Distinctive content. The four inputs that decide visibility; the modules that deliberately refuse the privileged flag; a change-risk summary; and a recommended change-control process, since MatrixIQ has no approval workflow for configuration and the Audit Log does not record configuration edits.

Excludes. Deployment, database administration, environment variables, and the TMS Tab Access matrix.

2.3 HR Module SOP

Covers. All seven HR submodules: Employees, Office Operation Expenses, Reimbursement, Admin Expenses, HR Expense Report, Travel Schedule and Daily Report Review. The reimbursement and travel chains are documented end to end, from both the employee's and the approver's side.

Distinctive content. The two different access patterns — the HR role gate and the named-individual gate — and the deliberate split between reading and acting on daily reports.

Excludes. Payroll, statutory compliance, recruitment, appraisal mechanics, and payment settlement.

2.4 Marketing Module SOP

Covers. Marketing Requests from the four-step wizard through approval, timeline commitment, assignment, acceptance, production, technical review and delivery, with cancellation and decline treated separately. Plus the Materials library: three document sources, categories, the folder tree, and the two-gate partner publication rule.

Distinctive content. The full fourteen-status vocabulary with the mapping onto the five statuses a partner sees; and an ordering constraint — approve, then set the timeline, then assign — that is easy to get wrong.

Excludes. Brand guidelines, creative standards and agency management.

2.5 Operations Module SOP

Covers. The Delivery Challan lifecycle including the return verification checklist and the monthly summary; and the support ticket lifecycle including the thirteen statuses, the three actor kinds, the complete transition matrix and the service-level targets by priority.

Also covers, as context. The Demo Schedule approval chain in both on-site and virtual modes, BOM and procurement handoffs, project handover, and the ownership boundaries between teams.

Excludes. Technical Project Management itself, which is identified throughout as a connected module rather than part of Operations.

2.6 Partner Portal SOP

Covers. All seven partner areas in partner-friendly language: Dashboard, My Leads / Projects, Quotations, Demo Requests, Marketing Materials, Marketing Requests and Technical Support. Written for an external reader, with what happens on our side explained so partners know what to expect.

Distinctive content. Mandatory access and security guidance expressed as partner obligations; published support service targets; and clear statements of the four things partners cannot do, each with its reason.

Deliberately excludes. Internal security implementation, database structure, interface details, credentials and administrative configuration. Internal status vocabulary is never exposed — only the collapsed partner-facing positions.

03 Coverage matrix — in-scope submodules

Thirty-one submodules fall within the six requested SOPs. An item is marked **Full** only where its purpose, available actions, workflow and permissions are all documented, or the missing information is explicitly flagged in the document.

Submodule	Key	SOP	Sections	Coverag
ACCOUNTS — 2 SUBMODULES				
Payments	`accounts-payments`	Accounts	5.1, 6.1–6.7, 7.1, 8.1–8.4, 9	Full
Audit Log	`audit-log`	Accounts; Administration	Acc 4.2, 5.2, 6.8, 8.5; Adm 6.11, 8.5	Full
ADMINISTRATION — 11 SUBMODULES				
User Management	`user-management`	Administration	5, 6.1.1–6.1.5, 8.1	Full
Role Management	`role-management`	Administration	5, 6.2, 8.3, 14.2	Full
Department Master	`department-master`	Administration	5, 6.3, 8.4, 14.4	Full
Module Manager	`module-manager`	Administration	5, 6.4, 8.2	Full
Custom Module Builder	`custom-modules`	Administration	5, 6.5, 8.2	Full
Products	`product-master`	Administration	5, 6.6, 9, 13.3	Full
Product Catalog	`product-catalog-overrides`	Administration	5, 6.7	Full
Application Settings	`app-settings`	Administration	5, 6.8, 14.4	Full
Meta Lead Integration	`meta-lead-integration`	Administration	5, 6.9, 10.3	Full
Daily Report Configuration	`daily-report-config`	Administration	5, 6.10, 10.3	Full
Audit Log	`audit-log`	Administration	6.11, 8.5	Full
HR — 7 SUBMODULES				
Employees	`hr-employees`	HR	5, 5.1, 6.1	Full
Office Operation Expenses	`office-operation-expenses`	HR	4.2, 5, 6.4, 7.3, 8.5	Full
Reimbursement	`reimbursement`	HR	5, 6.2, 6.3, 7.1, 8.1, 8.2, 14.2	Full
Admin Expenses	`admin-expenses`	HR	4.2, 5, 6.5, 7.3, 8.6	Full
HR Expense Report	`hr-reports`	HR	4.2, 5, 6.6, 9	Full
Travel Schedule	`travel-schedule`	HR	5, 6.7, 7.2, 8.3, 14.3	Full
Daily Report Review	`hr-daily-reports`	HR	4.3, 4.4, 5, 6.8, 7.4, 8.4	Full
MARKETING — 2 SUBMODULES				

Submodule	Key	SOP	Sections	Coverag
Marketing Requests	`marketing-requests`	Marketing	5.1, 6.1–6.5, 7, 8.1–8.5	**Full**
Materials	`materials`	Marketing	5.2, 6.6, 6.7, 8.6, 14.3	**Full**
OPERATIONS & SUPPORT — 2 SUBMODULES				
Back Office Operations	`backoffice`	Operations	4.1, 5.1, 6.1–6.6, 7.4, 8.1–8.3	**Full**
Technical Support	`support-tickets`	Operations	4.2–4.4, 5.2, 6.7, 6.8, 7.5, 7.6, 8.5–8.7	**Full**
PARTNER PORTAL — 7 SUBMODULES				
Dashboard	`partner-dashboard`	Partner Portal	5, 6.2	**Full**
My Leads / Projects	`partner-projects`	Partner Portal	5, 6.3, 6.4, 7.1, 8.1, 8.2, 14.2	**Full**
Quotations	`partner-quotations`	Partner Portal	3.3, 5, 6.5, 9, 9.2	**Full**
Demo Requests	`partner-demos`	Partner Portal	5, 6.6, 7.2, 8.3	**Full**
Marketing Materials	`partner-materials`	Partner Portal	5, 6.7, 9	**Full**
Marketing Requests	`partner-marketing-requests`	Partner Portal	5, 6.8, 7.3, 8.5	**Full**
Technical Support	`partner-support`	Partner Portal	5, 6.9, 7.4, 8.4, 10.3	**Full**

The Audit Log is a single module documented from two angles — its restriction in the Accounts SOP (because the Feature Reference lists it under Accounts) and its operation in the Administration SOP. Counted once, the thirty-one in-scope submodules are all covered.

04 Coverage matrix — cross-module workflows

Workflow	Source → destination	Documented in	Coverage
Reimbursement: submit → manager → HR → Accounts → paid	Reimbursement → Accounts	HR §6.2, 6.3, 7.1; Accounts §7.2	**Full**
Travel: submit → manager → HR → Admin → booking → HR verification	Travel Schedule → Accounts → HR	HR §6.7, 7.2; Accounts §7.3	**Full**
BOM: technical → admin → finance → payment → received	TMS → Accounts → TMS	Accounts §7.4; Operations §7.7.1; Administration §6.8	**Full**
Office and admin expense → monthly sheet → payment	HR registers → Accounts	HR §6.4.4, 6.5.2, 7.3; Accounts §7.5	**Full**
Partner opportunity → internal sales review → pipeline	Partner Portal → Sales	Partner §6.3, 6.4, 7.1, 14.4	**Full**
Marketing request → approval → timeline → assignment → technical review → delivery	Any dept / partner → Marketing → Technical	Marketing §6.1–6.5, 7; Partner §6.8, 7.3	**Full**
Demo: request → technical → manager → Back Office → dispatch → return → closure	Sales → Technical → Back Office	Operations §7.1–7.4, 8.4; Partner §6.6, 7.2	**Full**
Support: raise → triage → assign → resolve → close	Internal / partner → support desk	Operations §6.7, 6.8, 7.5, 7.6; Partner §6.9, 7.4	**Full**
Project handover from Sales to Technical	Sales → TMS	Operations §7.7.2, 7.7.3	**Full**
Materials publication to partners (two-gate rule)	Marketing → Partner Portal	Marketing §6.7, 14.3; Partner §6.7	**Full**
Administrative configuration → role, module and department access	Administration → everywhere	Administration §3.4, 6.2–6.4, 14.4	**Full**
Employee exit → work reassignment	Administration → Sales / TMS	Administration §6.1.5; HR §5.1	**Full**
Daily reporting: configuration → filing → warnings → HR review	Administration → Workspace → HR	Administration §6.10; HR §6.8, 7.4	**Full**
Status changes → audit trail	Every module → Audit Log	Accounts §6.8, 8.5; Administration §6.11, 8.5	**Full**

05 Reference submodules outside the six SOPs

The Feature Reference describes 52 modules. Twenty-four of them belong to departments for which no SOP was requested. They are listed here for completeness, with a note of where each is nonetheless touched as cross-module context.

Reference section	Submodules	Treatment in this SOP set
Sales (8)	Lead Capture / Inquiry, Project Dashboard, Site Visit Report, Demo Schedule, Quotations, Partner Quotation Requests, Billing, Partner Management	Demo Schedule is documented as a workflow in Operations §7.1–7.3. Billing is contrasted with the payment queue in Accounts §7.6. Quotations and Project Dashboard appear from the partner side. Partner Management is referenced in Administration §5.1. **The remainder would need a Sales SOP.**
Technical Project Management (7)	Technical Projects, TMS Dashboard, Tasks, BOM Request, Procurement, Users & Tab Access, Tab Access	BOM Request and Procurement are documented as handoffs in Operations §7.7.1 and Accounts §7.4. TMS is explicitly identified as a connected module, not part of Operations. **The remainder would need a TMS SOP.**
Workspace (4)	My Tasks, Team Tasks, Task Planner, Daily Report	Daily Report is documented from the configuration side in Administration §6.10 and the review side in HR §6.8 and §7.4. **Employee-facing task modules would need a Workspace SOP.**
Reports (5)	Analytics, Target Details, Performance Review, Team Daily Reports, Partner Analytics	Team Daily Reports is referenced where it bounds HR's rights (HR §6.8.3, §4.4). Performance Review and Partner Analytics are located in Administration §5.1. **The remainder would need a Reports SOP.**

> **RECOMMENDATION**
>
> Three further SOPs would complete the platform: **Sales**, **Technical Project Management** and a combined **Workspace & Reports** guide. The six delivered documents already contain the cross-module material those would need to reference, so they can be written without revisiting this set.

06 Discrepancies between the Feature Reference and the application

Each item below was found by checking the Feature Reference against the application. In every case the application has been treated as the source of truth, and the discrepancy is called out inside the relevant SOP so a reader of either document is not misled.

Topic	Feature Reference says	The application does	Flagged in
Audit Log access	Lists it under the Accounts section	Restricted to **Super Admin and Admin only**. The Accounts role cannot open it.	Accounts §4.2
Delivery Challan statuses	prepared → dispatched → returned → **verified** → closed	Four statuses. "Verify & Receive Material" is the *action* that produces *Returned*; there is no Verified status.	Operations §6.4
Role count	15 roles, including a privileged "Technical Team" role	**14 roles.** The `technical` role was retired and merged into Engineer, which is **not** privileged.	Administration §6.2.1
Attendance view	Listed under Employees	**Retired.** The module registration is removed and the page redirects to the dashboard.	HR §5.1
Birthdays and anniversaries	Described as part of the HR dashboard	On the **main MatrixIQ dashboard**, visible to everyone — not an HR module page.	HR §5.1
Employee exit	Listed under HR Employees	A separate module in the **Administration** section, open to anyone who manages a department.	HR §5.1; Administration §6.1.5
Office expense bill attachment	"Attach the bill"	**No attachment field exists** on the form or the record.	HR §6.4.1
Office expense picklists	"Category and Expense Head dropdowns, both with sub-levels"	Correct, with a nuance: edits sit on top of a built-in default list, and an emptied list is remembered as a decision.	HR §6.4.2
"Tracking missing bills"	Implies a general tracker of claims without bills	A **recovery panel** for bills whose files were lost from an earlier file store.	HR §6.2.4
HR module access	Implies the HR role reaches the people and spend modules	Office Operation Expenses, Admin Expenses and HR Expense Report are granted to **named individuals**; the HR role alone grants none of them.	HR §4.2; Administration §4.4
Marketing request statuses	submitted → assigned → accepted → in progress → technical review → delivered	**Fourteen statuses** with different names, plus separate approval and timeline steps the summary omits.	Marketing §2.5, §8.1

Topic	Feature Reference says	The application does	Flagged in
Partner marketing stages	received → in progress → in review → completed	The first partner-facing label is **Submitted**, not "Received". A fifth stage, *Not proceeding*, also exists.	Marketing §8.2; Partner §6.8
Materials document sources	"Add a document by Drive link"	**Three** sources: Drive link, uploaded file, and web link.	Marketing §6.6.1
Partner publication	"a per-document Share with partners toggle"	A **two-gate rule** — the document *and* every folder above it must be shared. Per-partner narrowing exists but has no control on the screen.	Marketing §6.7
Demo chain	One chain ending in equipment return	**Two chains.** A *virtual* demo involves no equipment and never reaches Back Office.	Operations §7.2
Document numbering	"Document numbering series" in Application Settings	Only the **Delivery Challan prefix** is configurable. Quotation numbering is fixed.	Administration §6.8.2
Meta integration	"Connect Facebook and Instagram Lead Ads"	Credentials are **server settings** and cannot be entered in the application; the screen reports presence only. Assignment rules and campaign routing are richer than described.	Administration §6.9
Product Catalog label	"Product Catalog Overrides"	The module is labelled **Product Catalog** in the interface.	Administration §5
Partner account states	"Activate, suspend or close an account"	Four states: pending, active, suspended, **inactive**. Only *active* permits portal use.	Partner §4.3
Partner submission outcome	"accepted / declined" reads as terminal	Only **accepted** is terminal. A declined submission **can** be accepted later.	Partner §6.4.4, §7.1
Reimbursement final status	"paid"	The status is **Payment Completed**, and there are two *Changes Requested* states the summary omits.	HR §8.1; Accounts §7.2
Back Office module visibility	Visible to the Manager role	Visible to Manager, but **acting** requires being a manager of the *Back Office* department.	Operations §4.1

07 Register of details that could not be verified

Every item below is marked in its SOP as ***To be verified in the live MatrixIQ application*** or ***To be confirmed*** rather than being assumed. They are consolidated here so they can be resolved in one pass.

SOP	Detail	Who can resolve it
ORGANISATIONAL — APPLIES TO ALL SIX DOCUMENTS		
All	Document owner, approver and review frequency	Management
All	Whether the platform's e-mail service is provisioned in this deployment — an unconfigured service skips sends silently	Platform technical owner
ACCOUNTS		
Accounts	Whether Method and Reference are individually mandatory on the payment dialog, and the list of methods offered	Accounts, from the live screen
Accounts	Whether the Audit Log can export more than the page currently displayed	Super Admin
Accounts	Escalation route for correcting a payment recorded in error	Accounts and management
ADMINISTRATION		
Administration	Which user-account fields are refused if left blank, beyond name, username, password and role	Administrator, from the live screen
Administration	Whether the bulk-import temporary password list can be regenerated after leaving the screen	Administrator
Administration	How to add or remove a named individual from the three restricted spend modules	Platform technical owner
Administration	Who holds authority to approve changes to tax, terms and pricing	Management
Administration	Monitoring cadence for the daily report scheduler and the Meta webhook	Administration
Administration	Review cadence for accounts and role assignments	Management
HR		
HR	Whether attendance is tracked anywhere following the retirement of the attendance module	HR
HR	Whether a waived missed-report warning can be reinstated from the Warnings screen	HR manager, from the live screen
HR	Whether Mode of Payment is mandatory on a reimbursement entry	Any employee, from the live form
HR	Where office expense bills are retained, given there is no attachment field	HR and Accounts

SOP	Detail	Who can resolve it
MARKETING		
Marketing	Whether a published document can be narrowed to specific partner companies from any screen	Platform technical owner
Marketing	Whether Priority is mandatory on the request wizard	Any user, from the live form
Marketing	Whether the individual Document name field is mandatory in Materials	Marketing, from the live form
Marketing	Whether any spreadsheet export of marketing requests exists	Marketing
Marketing	Review cadence for the published partner library	Marketing management
OPERATIONS		
Operations	Whether expected return date and Requested By are mandatory on a challan	Back Office, from the live form
Operations	Where the service-level policy per priority is edited in the application	Platform technical owner
Operations	Whether any spreadsheet export of challans or tickets exists	Back Office / support desk
Operations	Escalation route for a challan closed in error	Management
Operations	Who receives the monthly summary notification	Back Office
PARTNER PORTAL		
Partner Portal	Exactly which fields the opportunity and demonstration forms refuse to submit without	Partner-facing team, from the live forms
Partner Portal	Whether a demonstration request can be edited after submission	Partner-facing team
Partner Portal	Where portal user management appears in the menu for a Partner Admin	Partner-facing team
Partner Portal	Published turnaround targets for opportunity review and demonstration scheduling	Sales management

MOST OF THESE ARE QUICK TO CLOSE

Roughly two-thirds are single observations from a live screen — is this field refused when blank, does this control exist. A short session with each department in front of the application would close them and allow a version 1.1 with the flags removed.

08 Quality assurance performed

Check	Result	Method
Every in-scope submodule covered	**31 of 31**	Matrix in §3, built from the module registry rather than from the reference alone.
Every workflow checked against the application	**Done**	Statuses, transitions and authorisation rules read from the application and reproduced; 22 divergences from the reference recorded in §6.
Role permissions not overstated	**Done**	Each module's actual access rule documented, including the cases where the privileged flag is deliberately refused.
Status names and order verified	**Done**	Status vocabularies taken from the application's own labels, not paraphrased.
Internal and partner responsibilities separated	**Done**	Partner SOP uses only partner-facing vocabulary; internal SOPs document both views and the mapping between them.
Every procedure actionable	**Done**	Each has preconditions, numbered steps, what happens next, and failure handling with the actual messages.
Cross-module handoffs verified	**14 of 14**	Matrix in §4, each with source, destination, handoff condition and what travels.
Table of contents links resolve	**272 of 272**	Every link resolved through the PDF name tree; all point forward; none broken.
Printed page numbers match destinations	**136 of 136**	Printed number compared against the page each link actually lands on, in all six documents.
No clipped or overflowing content	**232 of 232 pages**	Every content page (all pages except the six covers) rendered to an image; zero ink found in the outer bleed band of any page.
No blank or near-empty pages	**None found**	Text extracted per page with header and footer boilerplate removed.
Page size and layout	**A4 throughout**	210 × 297 mm confirmed on every page; headers, footers and page numbers present on every content page.
Consistent terminology across documents	**Done**	Shared vocabulary for roles, statuses and modules; each document carries its own glossary.
Documents reopened and inspected	**Done**	All six rendered and read back, with representative pages inspected visually.

END OF DOCUMENT — COVERAGE MATRIX AND DELIVERY NOTES, VERSION 1.0
