NANTA

MATRIXIQ · DEPARTMENT OPERATING MANUAL

HR Module

Employees, reimbursement, office and admin expenses, expense reporting, travel, and daily report review.

STANDARD OPERATING PROCEDURE

Department / Module	HR & Admin — seven submodules
Document type	Standard Operating Procedure
Version	1.0
Preparation date	27 October 2026
Document owner	To be confirmed
Approved by	To be confirmed
Review frequency	To be confirmed
Classification	Internal Use — Confidential (contains guidance on personal and pay-related data)
Platform	MatrixIQ 1.0.0 — NANTA TECH LIMITED

Prepared from the *MatrixIQ Feature Reference* (13 pages) and verified against the MatrixIQ application itself on 27 October 2026. This module handles personal, expense and pay-adjacent information about identifiable employees. Handle every screen, export and printout accordingly.

01 Cover Page

The cover of this document carries its identity. It is reproduced here so that a printed or extracted section can still be traced back to the correct version.

DOCUMENT IDENTITY

Attribute	Value
Title	MatrixIQ — HR Module SOP
Platform	MatrixIQ, the internal business platform of NANTA TECH LIMITED
Module coverage	Employees, Office Operation Expenses, Reimbursement, Admin Expenses, HR Expense Report, Travel Schedule, Daily Report Review
Document type	Standard Operating Procedure
Version	1.0 — first issue
Preparation date	27 October 2026
Document owner	To be confirmed
Classification	Internal Use — Confidential

02 Document Control

2.1 Purpose of this document

This SOP explains how HR and Administration staff use MatrixIQ to maintain the employee directory, run the reimbursement cycle, record office and company-paid spend, report on all of it, manage business travel, and review the company's daily reporting regime.

It is also written for the employees and managers who feed these processes — because almost every HR workflow in MatrixIQ begins with someone outside HR. Section 6 therefore covers both sides of the reimbursement and travel chains.

2.2 Version history

Version	Date	Author	Summary of change
1.0	27 October 2026	To be confirmed	First issue. Prepared from the MatrixIQ Feature Reference and verified against the live application.

2.3 Ownership and approval

Role	Name	Responsibility
Document owner	To be confirmed	Keeps this document accurate as the HR modules change.
Approver	To be confirmed	Signs off each version before it is issued.
Reviewers	To be confirmed	HR, Administration and Accounts representatives.
Review frequency	To be confirmed	Re-review is also required after any change to Daily Report Configuration, the reimbursement deadline, or department managers.

2.4 Intended audience

- **Primary —** HR and Administration staff.
- **Primary —** HR department managers, who hold the HR decision in reimbursement, travel and daily report review.
- **Secondary —** Department managers across the company, who hold the first approval in reimbursement and travel.
- **Secondary —** Every employee, for the submission procedures in §6.2 and §6.7.
- **Reference —** Accounts, who receive the output of these chains.

2.5 Scope and limitations

In scope. The seven HR submodules, the reimbursement and travel approval chains end to end, and the HR half of the daily reporting regime.

Out of scope. Payroll, statutory compliance, recruitment, performance appraisal mechanics, and the settlement of payments — which belongs to Accounts.

- Three of these modules are granted to **named individuals** rather than to the HR role. Holding the HR role does not open them. See §4.2.
- Approval routing depends on Department Master. A change there alters who approves what, with no notice.
- Details the application could not confirm are marked ***To be verified in the live MatrixIQ application***.

CONFIDENTIALITY

These screens expose identifiable employees' expense claims, travel, contact details and reporting compliance. Access is deliberately narrow. Do not widen it informally, do not export to shared locations, and do not discuss an individual's claims or warnings outside the people who must act on them.

03 Introduction

3.1 What the HR module does

The HR module is where people and money meet: who works here, what they spent, where they travelled, and whether they reported their day.

It covers three distinct kinds of work. First, **the directory** — who is employed, in which department, with what contact details. Second, **spend** — three separate registers for money claimed back by employees, money the company paid on their behalf, and money spent running the offices, together with one report that reads all three. Third, **process stewardship** — holding the HR decision in the reimbursement and travel chains, and reviewing leave claims and missed-report warnings arising from the daily reporting regime.

3.2 Why it exists

- **A claim should not depend on a spreadsheet.** Reimbursement runs as a monthly sheet with a real approval chain, bill attachments and an Excel voucher at the end.
- **Approval should follow the organisation, not a hard-coded name.** Every HR approval resolves from Department Master, so a change of manager changes the routing automatically.
- **Spend should be answerable in one place.** The HR Expense Report reads reimbursement, admin expense and office operation spend together, by period, employee or department.
- **Reporting compliance should be visible but humane.** A day covered by an approved leave claim is never counted as missing, and a warning can be waived with a reason.

3.3 What HR users can and cannot do

An authorised HR user can	An HR user cannot
Open the employee directory and an employee's full profile.	Create a login account unless they are an HR department manager.
Hold the HR decision on a reimbursement sheet.	Pay it. Settlement belongs to Accounts.
Hold the HR review and the HR final verification on a travel request.	Book the tickets. That is the Accounts stage.
Approve or reject a leave claim, and waive a missed-report warning.	Edit or file a daily report for a department they do not manage.
Read every department's daily reports.	Act on them outside their own department. Reading and acting are separate grants.
Record office operating spend and company-paid admin expenses — *if individually granted*.	Reach those three registers on the strength of the HR role alone.
Extend a month's reimbursement submission deadline.	Change the default deadline — that is in Application Settings.

3.4 How HR connects to the rest of MatrixIQ

To Accounts

`reimbursement → accounts-payments`

An HR-approved sheet enters the Accounts payment queue. Accounts settles it; HR does not.

To and from Accounts

`travel-schedule`

HR reviews, Administration approves, Accounts books the tickets, then it returns to HR for final verification.

From Administration

`department-master`

Department managers decide who approves each stage. HR's own decisions are held by managers of the HR department.

From Administration

`daily-report-config`

Report formats, working days, deadline and reminder times, warning thresholds and exemptions are set there, not here.

From Administration

`app-settings`

The default reimbursement submission deadline day.

To Accounts

`office / admin expenses`

Both registers feed the Accounts payment queue as one monthly sheet each.

04 Access and Permissions

4.1 Two different gates

The HR submodules are not all protected the same way. There are two patterns, and confusing them is the most common source of "why can't I open this?".

Pattern	Modules	Who qualifies
A — the HR role gate	Employees, Daily Report Review	**HR, Super Admin and Admin.** The generic `manager` role is deliberately excluded, even though it is privileged — it covers every department's managers, and this is HR's own data.
B — the named-individual gate	Office Operation Expenses, Admin Expenses, HR Expense Report	**Super Admin, Admin, and specific named people only.** The HR role on its own grants nothing here.
Open to all employees	Reimbursement, Travel Schedule	Every employee uses these to submit. Review and decision stages are gated separately — see §4.3.

4.2 The named-individual gate, explained

HOLDING THE HR ROLE DOES NOT OPEN THE THREE SPEND REGISTERS

Office Operation Expenses, **Admin Expenses** and the **HR Expense Report** are granted to particular people by username, on top of Super Admin and Admin. This was a deliberate narrowing: one person needs the office register, a different person needs admin expenses, and other HR accounts need neither.

This grant cannot be changed from Role Management or Module Manager. Requests to add or remove a person go to the platform's technical owner. ***Escalation route: to be confirmed.***

4.3 Who holds each decision

Decision	Held by	Fallback if nobody is configured
REIMBURSEMENT		
Manager approval	A manager of the claimant's own department, as listed in Department Master	A sheet raised by a department manager skips this stage entirely and is shown as *Sent to HR*.
HR decision	A manager of the HR department (matched on any department whose name begins with "HR")	Admin and Super Admin can always act.
Deadline extension for a month	HR manager tier	—
TRAVEL SCHEDULE		

Decision	Held by	Fallback if nobody is configured
Manager approval	A manager of the traveller's own department	Admin and Super Admin override. If the traveller has no department, any privileged account may act.
HR review, and HR final verification	Managers of the HR department	Admin and Super Admin override; otherwise any privileged account.
Administration approval	Managers of the *Admin* or *Administration* department	Admin and Super Admin override; otherwise any privileged account.
Ticket booking	**Accounts** — the Accounts role, Super Admin, Admin, or the Accounts department's manager	Refused for anyone else: "*Only the Accounts team can complete ticket booking*".
DAILY REPORTS		
Leave claim decision; warning waiver	An **HR department manager**. The module gate alone is not enough — an HR-role account that does not manage the HR department cannot decide other people's leave claims.	Privileged accounts qualify as HR managers.
Reviewing a team's reports	Whoever manages that department, plus HR (read-only company-wide), plus Admin and Super Admin	—
ADMIN EXPENSES		
Batch approval	One **named approver**. A batch created by anyone else needs their sign-off before Accounts is told.	Batches created by the named approver themselves do not need separate sign-off.

4.4 Reading is not acting — the daily report split

> **THE CLEAREST EXAMPLE OF A DELIBERATE PERMISSION SPLIT IN MATRIXIQ**
>
> **HR reads every department's daily reports. HR can edit and file reports only within its own department.** Widening HR's visibility was deliberate; widening its authority was not. The same split applies to department managers elsewhere.
>
> Specifically, for an employee outside HR's own department an HR user can *view* the report but cannot *edit* it and cannot *file one on their behalf*. Only Admin and Super Admin, who see organisation-wide, hold both.

4.5 What each HR role can do, at a glance

Action	Employee	Dept. manager	HR role	HR dept. manager	Admin / Super Admin
Submit own reimbursement sheet	Yes	Yes	Yes	Yes	Yes
Approve a team member's sheet	No	Own team	No	HR stage	Yes

Action	Employee	Dept. manager	HR role	HR dept. manager	Admin / Super Admin
Open the employee directory	No	No	Yes	Yes	Yes
Create an employee account from the directory	No	No	No	Yes	Yes
Office Operation Expenses register	No	No	Only if named	Only if named	Yes
Admin Expenses register	No	No	Only if named	Only if named	Yes
HR Expense Report	No	No	Only if named	Only if named	Yes
Decide a leave claim / waive a warning	No	No	No	Yes	Yes
Read every department's daily reports	No	Own team	Yes	Yes	Yes
File a daily report on someone's behalf	No	Own team	Own dept only	Own dept only	Yes

05 Module and Submodule Directory

THE SEVEN HR SUBMODULES

Submodule	Key & address	Purpose, inputs, outputs and limitations
Employees	`hr-employees` `/hr/employees`	The active employee directory and individual profiles. *Inputs:* name, employee ID, designation, department, role, e-mail, phone. *Outputs:* an on-screen directory. *Limitation:* creating an account requires HR-manager standing; deletion is Super Admin only.
Office Operation Expenses	`office-operation-expenses` `/office-operation-expenses`	The HR/Admin office operating spend register. *Inputs:* date, office location, category, expense head, paid-by, amount. *Outputs:* monthly Excel register; a monthly sheet in the Accounts queue. *Limitation:* named-individual access; **no bill attachment field**; entries are permanently deleted, not soft-deleted.
Reimbursement	`reimbursement` `/reimbursement`	Monthly expense reimbursement sheets with a four-stage chain. *Inputs:* dated claims with bill proof. *Outputs:* Excel voucher; a payable item for Accounts. *Limitation:* a month must be over before its sheet can be submitted.
Admin Expenses	`admin-expenses` `/admin-expenses`	Company-paid hotel, ticket, visa and similar costs, split across employees. *Inputs:* type, dates, route or location, total amount, employees. *Outputs:* a monthly sheet in the Accounts queue. *Limitation:* named-individual access; a single named approver signs off batches created by others.
HR Expense Report	`hr-reports` `/hr/reports`	Reimbursement, admin expense and office operation spend in one report. *Inputs:* period, granularity, grouping, filters. *Outputs:* on-screen analysis and an export. *Limitation:* named-individual access; it reports, it does not approve.
Travel Schedule	`travel-schedule` `/travel-schedule`	Planned travel for client visits, with a six-stage chain. *Inputs:* route, dates, purpose, projects, companions, hotel and advance requests. *Outputs:* an approved, ticketed trip with documents attached. *Limitation:* HR does not book; Accounts does.
Daily Report Review	`hr-daily-reports` `/hr/daily-reports`	Leave claims and missed-report warnings. *Inputs:* a decision and, where required, a reason. *Outputs:* decided claims and waived warnings. *Limitation:* requires HR-manager standing; reviewing is not the same as editing or filing reports.

5.1 Two things the reference describes that are not where you would expect

REFERENCE DISCREPANCIES — VERIFIED AGAINST THE APPLICATION

Attendance view. The *Feature Reference* lists an attendance view under Employees. The attendance module has been **retired** from MatrixIQ: its registration is removed, and opening its address returns the user to the dashboard. **There is no reachable attendance screen.** Whether attendance is tracked elsewhere is ***To be verified in the live MatrixIQ application***.

Birthdays and work anniversaries. These are not on an HR module page. They appear in a **Celebrations** panel on the **main MatrixIQ dashboard**, visible to everyone who signs in, showing upcoming birthdays and work anniversaries with a *Today*, *Tomorrow* or *in N days* label.

Employee exit. The exit checklist, summary and commit are **not** part of Employees. They are a separate module at `/employee-exit` in the Administration section, open to anyone who manages a department. See the Administration Module SOP §6.1.5.

06 Detailed Step-by-Step Procedures

6.1 Employees

Preconditions

- You hold the HR, Admin or Super Admin role. To create an account you must additionally be an HR department manager, or Admin / Super Admin.

Procedure — browsing the directory

1. Open **HR** → **Employees**. The active employee directory is listed.
2. Use the filter bar to narrow by department, or search for a person.
3. Open a row to read the full profile — name, username, employee ID, designation, department, role, e-mail and phone.

Procedure — adding an employee

1. Select the add control. It is present only for HR managers, Admin and Super Admin.
2. Complete: name, username, password, phone, e-mail, employee ID, designation, department and role. There is also a tick to mark the person a **department manager**.
3. Save. A welcome e-mail is sent if the platform's e-mail service is configured.

> **MARKING SOMEONE A DEPARTMENT MANAGER HAS WIDE CONSEQUENCES**
> Department managers approve reimbursements and travel for their team, gain sight of their team's daily reports and tasks, and in some departments gain access to whole modules — the Accounts payment queue and Back Office operations among them. Do not set this tick as a courtesy title. See the Administration Module SOP §6.3.

Procedure — editing an employee

1. Select **Edit** on the person's row.
2. Change name, phone, e-mail, employee ID, designation or role as needed, then save.
3. For deactivation, password resets and bulk import, use **Administration** → **User Management**.

> **SUPER ADMIN ACCOUNTS ARE NOT LISTED**
> Super Admin accounts are invisible to every other role, including Admin, by design. Their absence from the directory is not a fault.

SCREENSHOT PLACEHOLDER

[Insert screenshot: HR → Employees, the directory with the department filter]

6.2 Reimbursement — the employee's side

Every employee uses this. The screen opens on the **My Sheet** tab. Reviewers additionally see **Pending Approvals** and **Approved**.

6.2.1 Before you start

Rule	Detail
Which month you may add a *new* claim to	The current month or the one immediately before it. A sheet already sent back for correction is exempt, so a requested fix never becomes impossible.
Which month you may *submit*	The month must be over. September's sheet becomes submittable on 1 October. There is no lower bound — a forgotten June sheet can still be sent.
By when you must submit	A day-of-month deadline, shown at the top of the screen. HR can extend it for a given month.
Bill proof	Required on every claim **except** a Conveyance claim by 2 Wheeler or 4 Wheeler, where the amount is computed from distance.

6.2.2 Adding a claim

1. Open **Reimbursement**. Set the **month** and **year** in the toolbar.
2. Select **+ Add Entry**. If the button is absent, read the hint beside it — new entries can only be added for the current or previous month.
3. **Date *** — the date of the expense.
4. **Description *** — choose one of: Lunch, Dinner, Snacks, Conveyance, Bus Ticket, Train Ticket, Flight Ticket, Hotel, Parking Fees, Other. Choosing *Other* opens a free-text box, which is then required.
5. If you chose **Conveyance**, a **Vehicle Type *** choice appears:

Vehicle type	Rate	Effect
2 Wheeler	₹4 per km	Distance × rate is calculated for you and the amount becomes read-only. **Bill proof is not required.**
4 Wheeler	₹8 per km	
Cab	—	Enter the amount yourself. **Bill proof is required.**

6. **Who was present** — add yourself and anyone else the expense covers. Colleagues are picked from the employee list; a guest who is not a MatrixIQ user can be typed in by name. At least yourself must be on the entry.
7. For Conveyance, Bus Ticket, Train Ticket and Flight Ticket, enter **From** and **To**. Both are required for Conveyance.
8. For Conveyance by 2 Wheeler or 4 Wheeler, enter **Kilometers ***. The amount is calculated.
9. **Amount (₹) *** — enter it unless it has been calculated. The amount in words is shown back to you.
10. **Mode of Payment** — Cash, UPI, Bank Transfer, Credit Card, Debit Card, Cheque or Other.

11. Attach the **bill proof** — images or PDF, up to 10 MB per file. More than one may be attached.
12. Save the entry. It appears in the month's table with columns Date, Description, Present, From, To, Amount, Payment and Bill Proof, and a running **Monthly Total**.

Use **+ Add Multiple** to enter several similar claims in one pass.

SCREENSHOT PLACEHOLDER

[Insert screenshot: Reimbursement → Add Entry, showing the Conveyance vehicle-type options and the calculated amount]

6.2.3 Replacing a bill without losing the entry

If a bill image is wrong or unreadable, edit the entry and attach the correct file. The claim's date, description, amount and approval position are preserved — you do not have to delete and re-create it.

6.2.4 The missing-bills panel

> **WHAT "TRACKING MISSING BILLS" ACTUALLY MEANS**
>
> A panel appears at the top of the Reimbursement screen only when a bill file **can no longer be opened**. This is a **recovery tool**, not a general tracker of claims submitted without a bill: an earlier file store was lost, so some claims reference bill images that no longer exist. The claims themselves — date, description, amount, who — are intact.
>
> If the panel appears for you, it lists your affected claims with one upload control per lost file. **Send the original again** — a photo or the e-mailed receipt. This works even on claims that have already been approved, which the ordinary edit form will not touch. HR, Accounts and Admin additionally see who is affected and a control that asks everyone concerned to re-upload, by notification and e-mail. The panel disappears entirely once every bill can be opened again.

6.2.5 Submitting the sheet

1. Check the **Monthly Total** and that every claim has its bill.
2. Read the deadline line at the top of the screen. It states the submission deadline day for that month, and whether it has been extended and by whom.
3. Select **Submit to Manager for Approval**. The button is disabled if the month is not yet submittable.
4. The sheet's status becomes **Awaiting Manager Approval** and the claims are locked.

> **IF YOU MANAGE A DEPARTMENT**
>
> A sheet created by a department manager **skips manager review entirely** and goes straight to HR. Its status reads **Sent to HR** rather than "Manager Approved", because no human manager actually reviewed it. This is correct behaviour.

6.2.6 Responding to a change request

1. When a reviewer asks for changes, the sheet's status becomes **Changes Requested (Manager)** or **Changes Requested (HR)**, and the reviewer's remarks are shown.
2. The sheet is editable again. New entries may be added **whatever month it is** — the usual add window does not apply to a sheet sent back for correction.

3. Make the requested corrections and submit again.

6.2.7 Exporting the voucher

With entries present, select **Export Voucher** to download the month's expense voucher as an Excel file. From a sheet detail, **Download Voucher** does the same. Reviewers can also merge every attached bill for a sheet into a single PDF for checking.

6.3 Reimbursement — manager and HR review

6.3.1 Manager decision

1. Open **Reimbursement** and select the **Pending Approvals** tab. It carries a count.
2. Open a sheet. Read the entries, the **Monthly Total**, and open the bill proofs.
3. Under **Your Decision**, approve or request changes. **Remarks are optional for an approval and required when requesting changes.**
4. On approval the sheet moves to HR. On a change request it returns to the employee with your remarks.

6.3.2 HR decision

1. Open the **Pending Approvals** tab. Sheets at **Manager Approved** are awaiting you.
2. Open the sheet and check it against policy — eligibility, rates, duplicates, whether a bill is genuinely attached where one is required.
3. Under **HR Review**, approve or request changes. Remarks are required for a change request.
4. On approval the status becomes **HR Approved** and **the sheet enters the Accounts payment queue**. HR's involvement ends there.

6.3.3 Extending a month's deadline

1. On the Reimbursement screen, find the deadline line at the top.
2. Select **Extend this month's deadline** — visible only to those authorised.
3. Enter the new day of the month (1–31) and **Save**.
4. The line now shows the new day and records that it was extended, and by whom. Extensions are additive history; the most recent one governs.

The default deadline day for every month is set in **Administration → Application Settings → Reimbursement Settings**, and may be left blank for no deadline.

6.3.4 Deleting an approved but unpaid claim

> **PERMANENT, AND DELIBERATELY DIFFICULT**
>
> An approved-but-unpaid sheet can be removed. MatrixIQ requires a written reason — "*Why is this being deleted?*" — and requires you to type a confirmation. **This is a real deletion: the sheet and the employee's own bill entries for that month are gone and cannot be recovered.**
>
> Two things are deliberately kept: Admin Expense entries, which belong to a different module and may cover other employees; and the uploaded bill images themselves, because orphaning a file is recoverable and deleting the wrong one is not.
>
> Use this only for a genuine duplicate or an erroneous claim, with the reason recorded. It is not a correction tool — for that, request changes instead.

6.4 Office Operation Expenses

The HR/Admin office operating spend register, covering office, electricity, guest, director, salary and pantry expenses among others. **Named-individual access** — see §4.2.

6.4.1 Recording an expense

1. Open **Office Operation Expenses**. Set the **month** and **year**.
2. Select **+ Add Expense**. The form notes that the **Sr No.** is assigned automatically on save.
3. Complete the fields:

Field	Required	Notes
Date *	Required	The date of the expense.
Office Location *	Required	Ahmedabad or Mumbai.
Category *	Required	Office, Employee, Guest, Director or Salary — as configured. A sub-level appears only for categories that have one.
Expense Head *	Required	Stationary and Printing, Pantry, Water Jug, Porter, Courier and Postage, Tempo, Miscellaneous, Electricity, Internet, CUG, IT Materials, Salary, Legal, HR, Department, Godown 30, Godown 31, Flowers, Maintenance, Rent, Training, EXPO / Event — as configured. Several sub-items may be selected where the head offers them; *Department* draws its sub-items from Department Master.
Item Qty	Optional	Leave blank where a count is meaningless, such as an electricity bill. A supplied value must be greater than zero. Blank is deliberately different from a quantity of 1.
Amount (₹) *	Required	Must be greater than zero.
Description	Optional	What was purchased or paid for.
Paid By *	Required	One of the named payers, or *Other* — which opens a required name box.

4. Save. If the entry's date falls outside the month on screen, the view jumps to that month so the saved row does not silently vanish.

> **REFERENCE DISCREPANCY — THERE IS NO BILL ATTACHMENT**
>
> The *Feature Reference* lists "attach the bill" for this module. **The Office Operation Expenses form has no attachment field** and the record carries no bill document. (The only documents the record can hold are the payment-proof files Accounts adds when settling.) Keep bills by whatever means the organisation requires outside MatrixIQ, and use **Description** to record a bill or invoice number. ***Document-retention requirement: to be confirmed.***

6.4.2 Editing the Category and Expense Head lists

1. Select **Categories** in the toolbar. The option editor opens.
2. Add, rename or remove Category and Expense Head values, and their sub-levels.
3. Save. The form, the validation behind it and the Excel export all use the edited lists immediately.

> **HOW EDITS SIT ON THE BUILT-IN LISTS**
>
> MatrixIQ ships a default vocabulary. A list you have never edited follows that default and gains any future additions to it. Once you edit a list, your version governs — including deliberately emptying one, which is remembered as a decision rather than treated as "never configured". Removing a parent value also removes its sub-list, since that sub-list could never be reached again.

> **RENAMING A VALUE DOES NOT RE-LABEL PAST ENTRIES**
>
> Entries already recorded keep the text that was stored at the time. Renaming a category will split a period report between the old and new spelling. Prefer adding a new value and retiring the old one at a period boundary.

6.4.3 Reading, editing and exporting the register

1. The table shows **Sr No.**, **Date**, **Office**, **Category**, **Expense Head**, **Qty**, **Amount**, **Description**, **Paid By**, **Entered By** and **Actions**, with a month total.
2. Use the row actions to edit an entry. The serial number never changes once assigned.
3. Select **Export .xlsx** to download the month's register, prepared in your name. The control is disabled when the month has no entries.

> **DELETION HERE IS PERMANENT**
>
> Unlike most of MatrixIQ, the office expense register does **not** keep a recoverable copy of a deleted row. A deletion cannot be undone. Edit rather than delete wherever possible.

6.4.4 How the register reaches Accounts

Every unpaid entry for a calendar month forms **one payable sheet** in the Accounts payment queue. There is no approval step on the entry itself — an entry becomes payable simply by existing. The control over this spend is the restricted access to the register, not an approval chain. Record entries accurately and promptly, because an entry added late in the month changes a sheet Accounts may already be looking at.

6.5 Admin Expenses

Costs the company pays directly on employees' behalf, often shared across several people. **Named-individual access** — see §4.2.

6.5.1 Recording an expense

1. Open **Admin Expenses** and start a new entry.
2. **Expense Type *** — Hotel, Visa Expense, Bus Ticket, Train Ticket, Flight Ticket or Other Expense.
3. Complete the fields the type calls for:

For a…	Fields
Hotel	Check-in Date *, Check-out Date *, Location *
Ticket (bus, train, flight)	From *, To *, Trip Type * (One-Way or Return), and Return Date * for a return trip
Visa Expense	Details (optional) — for example *US Visa*, *UK Visa Renewal*
Other Expense	Specify Type * — for example *Taxi*, *Courier*, *Parking* — and Location / Details (optional)

4. **Total Amount (₹) *** — the whole cost, not the per-person share.
5. Choose the employees the expense covers. Search the list, or use **Select All** and **Clear**. A **Split Preview** shows the resulting per-person figure.
6. Save.

> **HOW THE SPLIT IS ACCOUNTED**
>
> Each employee receives their own row carrying their share. Reports and the Accounts queue sum the *per-person* figures, never the batch total repeated on each row — so a multi-employee expense is counted once.

6.5.2 Approval

1. A batch created by anyone other than the single **named approver** is created as **Pending Approval**.
2. The named approver opens the batch, checks it, and approves. A batch created by the named approver themselves needs no separate sign-off.
3. On approval, Accounts is notified. Approved entries for a calendar month then form one payable sheet.

> **UNAPPROVED ENTRIES NEVER REACH ACCOUNTS**
>
> Only **approved** admin expense entries are swept into a month's payable sheet, even if their date falls within it. An entry left pending sign-off will quietly never be paid. Clear the pending list before each month end.

The register lists **Date**, **Type**, **Location / Route**, **Total (₹)**, **Employees**, **Per Person (₹)**, **Added**, **Status** and **Actions**.

6.6 HR Expense Report

One report across all three spend sources. **Named-individual access** — see §4.2.

1. Open **HR → HR Expense Report**.
2. Set the **period** — a from and to date — and the **granularity**: **Monthly**, **Quarterly** or **Yearly**. Selectors for **All Months** and **All Quarters** narrow further.
3. Choose the **expense types** to include: **Reimbursement**, **Admin Expense**, **Office Operation**. Omitting the choice includes all three; at least one must be selected.
4. Narrow by **All Departments** or **All Employees** as required.
5. Tick **approved entries only** to exclude anything not yet signed off.
6. Choose how to group the result — by **employee**, by **department**, or by **source**.
7. Read the summary tiles, then the tables: **By Expense Type** and **Overall**, each showing **Entries** and **Total**.
8. Select the export control to download the result. **Reset** clears the filters.

> **THE EXPORT ALWAYS MATCHES THE SCREEN**
> The report and its export read the same filters from the same place, so an export can never disagree with the figures you were looking at. Note the filters alongside any file you circulate.

> **DATES ARE READ AS LOCAL CALENDAR DATES**
> Expense dates are treated as plain calendar dates, so an expense on the first of a month is never filed under the previous one. Figures are therefore stable regardless of who runs the report.

6.7 Travel Schedule

6.7.1 Raising a travel request

1. Open **Travel Schedule** and select **New Travel Request**.
2. **Origin *** and **Destination ***.
3. Under *When do you need to reach the destination?* — **Arrival Date *** and **Arrival Time**.
4. Under *When do you want to leave the destination?* — **Departure Date** and **Departure Time**.
5. **Project(s)** — one trip can cover several projects at the destination. Add each one.
6. **Linked Client** and **Travel Companions** — companions are chosen from MatrixIQ users.
7. **Mode of Travel** — Plane, Train or Cab.
8. **Purpose of Travel** — Meeting, Demo, Site Survey, Event or Others. Choosing *Others* opens **Specify Purpose ***.
9. **Suggest a Flight / Train / Cab (optional)** — free text, for example *IndiGo 6E-234, morning departure*. Accounts considers it when booking; it is never binding.
10. **Add Co-Traveller** — for people who are not MatrixIQ users. Each needs a **Name ***, and optionally contact, origin, destination and travel date.

11. **Hotel Accommodation** — if required: **Preferred Area ***, Suggested Hotel, Location, **Check-in Date ***, **Check-out Date ***, Guests, Additional Requirement.
12. **Advance Request** — if required: **Requested Amount (₹) *** and a Reason / Remark.
13. Save. The request is created as a **Draft**.
14. Open it and select **Submit for Approval**.

SCREENSHOT PLACEHOLDER

[Insert screenshot: Travel Schedule → New Travel Request, showing the hotel accommodation and advance request sections]

6.7.2 Manager decision

1. Open the request from the Travel Schedule list.
2. Read the route, dates, purpose, projects, companions and any hotel or advance request.
3. Select **Manager Approve** or **Request Changes**, with remarks.

Only a manager of the traveller's own department may act, or an Admin / Super Admin. Anyone else is refused: "*Only the department manager can approve this request*". The stage is available only while the request is at **Submitted**.

6.7.3 HR review

1. Open a request at **Manager Approved**.
2. Check it against travel policy — necessity, duration, accommodation and any advance.
3. Record an **estimated cost** and attach any **HR documents**.
4. Select **HR Approve** or **Request Changes**.

Only a manager of the HR department may act, or an Admin / Super Admin: "*Only HR can review this request*".

6.7.4 Administration decision

1. Open a request at **HR Reviewed**.
2. Select **Admin Approve** or **Request Changes**, with remarks.

Only a manager of the *Admin* or *Administration* department may act, or an Admin / Super Admin: "*Only Admin can approve this request*".

6.7.5 Ticket booking — the Accounts stage

This stage is **not** HR's. Once the request is at **Admin Approved**, the Accounts team selects **Complete Booking**, enters the **Booking / Ticket Details *** (ticket numbers, PNR, flight or train details, timings), attaches the **Ticket Documents**, and records the actual cost. MatrixIQ refuses anyone else: "*Only the Accounts team can complete ticket booking*". On completion the status becomes **Ticket Booked** and HR is notified that final verification is needed.

6.7.6 HR final verification

1. Open a request at **Ticket Booked**.
2. Check the booking details and ticket documents against what was approved, and compare the **Actual Cost** with the **Estimated Cost**.
3. Select **Verify & Confirm** to complete the request, or **Send Back**.
4. If sending back, choose a destination:

Send back to	Use when
Employee (for corrections)	The traveller must change something about the request.
Department Manager (re-verify)	The trip has changed enough that the manager should look again.
HR Department (re-verify)	The HR review itself needs revisiting.

   Provide remarks explaining what is wrong.
5. On confirmation the status becomes **Completed** and the traveller is notified.

6.8 Daily Report Review

Open **HR → Daily Report Review**. The screen has two tabs: **Leave Claims** and **Warnings**. You must be an HR department manager (or Admin / Super Admin) to decide anything here.

6.8.1 Deciding a leave claim

1. Open the **Leave Claims** tab. Filter by **Pending**, **Approved**, **Rejected** or **All**, and search by employee. Pending claims are listed first.
2. Read the row: **Employee**, **Department**, **Reporting date**, **Reason**, **Submitted at**, **Status**, **Reviewed by**, **Decision reason**.
3. Select **Approve** or **Reject**. A **Reason *** is required.

Decision	Effect on the reporting obligation
Approve	The date is excused. **A day covered by an approved leave claim is never counted as missing.**
Reject	Governed by the configured policy: either *reinstate the reporting obligation* — the day counts as missed again, which is the configured default — or *waive the obligation for that date*. The policy is set in Daily Report Configuration.

> **A PENDING CLAIM ALREADY EXCUSES THE DAY**
> A claim that is still awaiting your decision counts as live, so the date is not treated as missed while you consider it. An employee cannot raise a second claim for a date that already has a live claim.

6.8.2 Reviewing and waiving warnings

1. Open the **Warnings** tab. Filter by **With active warnings**, **At or over the threshold**, or **All, including fully waived**, and search by employee.

2. Warnings are grouped by employee and month. A group showing **HR informed** has reached the configured threshold — three active warnings in a month, as configured.
3. To excuse one, select **Waive** and enter a **Reason ***, for example "*Employee was on approved leave; claim raised late.*"
4. The warning becomes **Waived**. **The record is not deleted** — it leaves the active count while remaining visible in the history, which is what keeps the trail honest.

> **REINSTATING A WAIVED WARNING**
>
> MatrixIQ's warning interface accepts a reinstate action as well as a waive, but **no reinstate control was found on the Warnings screen**. Whether reinstating is available to HR in practice is ***To be verified in the live MatrixIQ application***. Treat a waiver as final and record the reason carefully.

6.8.3 What this screen is not

> **REVIEWING IS NOT EDITING OR FILING**
>
> Daily Report Review decides leave claims and warnings. It is **not** where reports are read in bulk, edited, or filed on someone's behalf — that is **Team Daily Reports**, and there HR's rights are narrower: HR reads every department but may edit and file only within its own. Only Admin and Super Admin hold both company-wide.

07 Workflow and Approval Process

7.1 Reimbursement

STAGE 0 **Draft** — Employee → STAGE 1 **Awaiting Manager** — Dept. manager → STAGE 2 **Manager Approved** — HR manager → STAGE 3 **HR Approved** — Accounts → STAGE 4 **Payment Completed** — —

EXCEPTION **Changes Requested (Manager)**

By: the department manager · **Remarks:** required · **Result:** the sheet returns to the employee and becomes editable, with the add-window restriction lifted.

↓

EXCEPTION **Changes Requested (HR)**

By: the HR manager · **Remarks:** required · **Result:** as above.

↓

SHORTCUT **Sent to HR**

When: the sheet was created by a department manager · **Result:** manager review is skipped; no manager name is recorded.

AUTOMATIC VERSUS MANUAL — REIMBURSEMENT

Event	Automatic?	Who acts
A monthly sheet is created when the first claim is added	**Automatic**	—
Conveyance amount calculated from distance	**Automatic**	—
Submitting, approving, requesting changes	**Manual**	Employee, manager, HR
Appearing in the Accounts queue on HR approval	**Automatic**	—
Payment	**Manual**	Accounts
Notification and e-mail at each stage	**Automatic**	—

7.2 Travel Schedule

STAGE 1 **Submitted**

Owner: the traveller · **Action:** Submit for Approval.

↓

STAGE 2 **Manager Approved**

Owner: a manager of the traveller's department, or Admin / Super Admin · **Action:** Manager Approve.

Request Changes → status becomes *Changes Requested* and returns to the traveller.

↓

STAGE 3 **HR Reviewed**

Owner: an HR department manager · **Action:** HR Approve, recording the estimated cost and any HR documents.

Request Changes → returns to the traveller.

↓

STAGE 4 **Admin Approved**

Owner: an Administration department manager · **Action:** Admin Approve.

Request Changes → returns to the traveller.

↓

STAGE 5 **Ticket Booked**

Owner: Accounts · **Action:** Complete Booking — booking details, ticket documents, actual cost. HR is notified on completion.

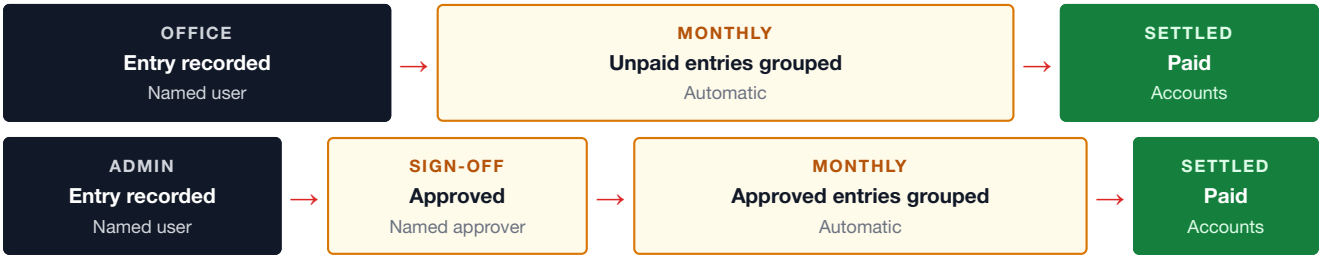

↓

STAGE 6 **Completed**

Owner: an HR department manager · **Action:** Verify & Confirm.

Send Back → to the employee for corrections, to the department manager to re-verify, or to HR to re-verify.

7.3 Office and Admin expenses

The key difference: an office operation expense is payable the moment it exists; an admin expense is payable only once the named approver has signed it off.

7.4 Daily reports — the HR half

DAILY **Employee files, or does not**

Deadline: the configured cut-off time on a working day — 11:00 IST as configured. After it, a report is marked *submitted late*.

Away that day? The employee raises a **leave claim** for that date instead.

↓

AUTOMATIC **Reminders and the sweep**

By: the scheduler · **Sends:** an evening reminder on the reporting date and a final reminder on the deadline day · **Raises:** a warning for a missed report.

Never raised for a date covered by a live leave claim, for an exempt employee, or on a non-working day.

↓

HR **Decide the leave claim**

By: an HR department manager · **Reason:** required · **Rejection:** reinstates the obligation, or waives it, per the configured policy.

↓

HR **Review and waive warnings**

By: an HR department manager · **Threshold:** HR is informed once an employee reaches the configured number of active warnings in a month — three, as configured · **Waiving** removes it from the active count without deleting the record.

HR DOES NOT SET THE REGIME

Working days, the deadline time, reminder times, the warning threshold, the leave-rejection policy and the exemption list are all configured in **Administration → Daily Report Configuration**. HR operates the regime; Administration defines it.

08 Field and Status Reference

8.1 Reimbursement sheet statuses

Status on screen	Set by	Meaning and next step
Draft	Created automatically with the first claim	The employee's to edit and submit.
Awaiting Manager Approval	Employee, on submit	With the department manager. Claims are locked.
Changes Requested (Manager)	Department manager	Back with the employee; editable, with the add-window restriction lifted.
Manager Approved	Department manager	With HR.
Sent to HR	Automatic	Same stage as above, shown this way when the sheet's creator is a department manager and no human manager reviewed it.
Changes Requested (HR)	HR manager	Back with the employee; editable.
HR Approved	HR manager	**In the Accounts payment queue.** Awaiting settlement.
Payment Completed	Accounts	Terminal.

8.2 Reimbursement entry fields

Field	Required	Notes
Date	Required	The date of the expense.
Description	Required	One of ten fixed options. *Other* requires free text.
Vehicle Type	Conditional	Required when the description is Conveyance. 2 Wheeler (₹4/km), 4 Wheeler (₹8/km) or Cab.
Who was present	Required	At least yourself. Colleagues and named guests may be added.
From / To	Conditional	Shown for Conveyance and the three ticket types. Required for Conveyance.
Kilometers	Conditional	Required for Conveyance by 2 Wheeler or 4 Wheeler. Drives the amount.
Amount (₹)	Required	Read-only when calculated from distance.
Mode of Payment	***To be verified***	Cash, UPI, Bank Transfer, Credit Card, Debit Card, Cheque, Other.
Attachment (Bill Proof)	Conditional	Required except for Conveyance by 2 Wheeler or 4 Wheeler. Images or PDF, up to 10 MB.

8.3 Travel Schedule statuses

Status	Set by	What it means
Draft	Traveller	Not yet submitted.
Submitted	Traveller	Awaiting manager approval.
Manager Approved	Department manager	Awaiting HR review.
HR Reviewed	HR manager	Awaiting Administration approval.
Admin Approved	Administration manager	Awaiting ticket booking by Accounts.
Ticket Booked	Accounts	Awaiting HR final verification.
Completed	HR manager	Terminal.
Changes Requested	Any approving stage, or HR at final verification	Back with the traveller, or returned to an earlier stage to re-verify.

While a request is awaiting a stage, the list shows a plain-language position: *Awaiting Manager Approval*, *Awaiting HR Review*, *Awaiting Admin Approval*, *Awaiting Ticket Booking*, *Awaiting HR Final Verification*.

8.4 Daily report statuses, claims and warnings

Object	Values	Notes
Report submission	Draft · Submitted · Submitted late	Submission is terminal — once filed, the content is locked and changing it needs a department manager's permission through an edit request.
Leave claim	Pending Approved Rejected	Pending and Approved both excuse the date. Rejection follows the configured policy.
Missed-report warning	Active Waived	Waiving removes it from the active count; the record remains.

8.5 Office Operation Expense fields

See the table in §6.4.1 for the complete list, which required fields, and the configured vocabulary. In summary: **Date**, **Office Location**, **Category**, **Expense Head**, **Paid By** and **Amount** are required; **Item Qty** and **Description** are optional; sub-levels are conditional on the parent value chosen. The **Sr No.** is assigned automatically and never changes.

8.6 Admin Expense fields and statuses

Field or status	Detail
Expense Type	Hotel · Visa Expense · Bus Ticket · Train Ticket · Flight Ticket · Other Expense
Trip Type	One-Way or Return. A return trip requires a Return Date.

Field or status	Detail
Total Amount	The whole cost. The per-person figure is derived and shown as a Split Preview.
Status	**Pending Approval** until the named approver signs off. Only approved entries reach Accounts.

09 Reports, Downloads and Exports

Output	Format	Who can produce it	Contents
Expense voucher	Excel	The sheet's owner; reviewers from a sheet detail	One employee's month of claims as a voucher.
Merged bills	PDF	Reviewers, from a sheet detail	Every attached bill for a sheet in one file, for checking. Reports how many files could not be included.
Office expense register	Excel	Named grantees, Admin, Super Admin	One month's register with the total and the preparer's name.
HR Expense Report	Export	Named grantees, Admin, Super Admin	Reimbursement, admin and office spend for the chosen period, granularity, grouping and filters.
Reimbursement Report	CSV	Accounts	Month by employee, with how much has reached payment. Produced in the Accounts module.
Daily report sheets	CSV	Managers, HR, Admin	Produced from Team Daily Reports, not from Daily Report Review.

9.1 Filtering and interpretation

- The HR Expense Report's filters are period, granularity (monthly, quarterly, yearly), expense type, department, employee, approved-only, and grouping (employee, department, source).
- **Approved entries only** changes the answer materially. Say which setting a circulated figure used.
- Figures include every source you selected. A total that mixes reimbursement with company-paid admin expense is not an employee's personal claim total.
- The office expense export covers one month at a time; the HR Expense Report is the right tool for a period view.

EXPORTS CARRY PERSONAL DATA

Every export here names identifiable employees and what they spent. Store them where only the authorised group can read them, and delete working copies when finished. Do not attach them to wide internal distribution lists.

10 Notifications and Follow-Ups

10.1 What MatrixIQ sends

Event	Who is notified	What the recipient must do
A reimbursement sheet is submitted	The department manager	Review and decide.
A reimbursement sheet reaches HR	HR managers	Review and decide.
Changes are requested on a sheet	The employee	Correct and re-submit.
A sheet is HR-approved	The Accounts department	Settle it from the payment queue.
A payment is held or resumed	Whoever raised the record	Read the hold reason and supply what is missing.
An admin expense is created, updated or approved	The Accounts department	Expect it in that month's sheet.
A travel request moves stage	The next approver, and the traveller	Act on the stage now theirs.
Accounts completes a travel booking	HR managers	"*Travel booking complete — needs final verification*" — verify and confirm.
Travel is confirmed	The traveller	Travel.
Daily report reminders	Employees and their managers	File the report before the deadline.
A missed-report threshold is reached	HR	Review the warnings and decide whether to waive.
Bills can no longer be opened	Affected employees, on request	Re-upload the original bill.
Birthdays and work anniversaries	The company	Shown on the main dashboard; an e-mail may also be sent.

10.2 Deadlines and timing

Deadline	As configured	Enforced?
Reimbursement submission day of month	Set in Application Settings	Shown on screen; may be extended per month by HR.
Reimbursement claim month must be over	—	**Yes.** The submit control is disabled until the month ends.
New claims only for this or last month	—	**Yes**, except on a sheet sent back for changes.
Daily report deadline	11:00 IST	**Yes** — a later report is marked *submitted late*.
Evening reminder	21:00 IST	Only while the scheduler is on and dry run is off.

Deadline	As configured	Enforced?
Final reminder on the deadline day	10:00 IST	As above.
Warnings in a month that inform HR	3	Automatic.
Reimbursement payment target	20th of the expense month	No — an Accounts display target only.

10.3 How e-mail behaves

E-MAIL CAN FAIL SILENTLY

Mail is sent through Amazon SES using server settings. If those are not provisioned, MatrixIQ skips the send and continues without an error. Never assume an approver was e-mailed. The in-app bell and the **Pending Approvals** tab are the reliable work lists.

11 Common Problems and Troubleshooting

Problem	Likely cause	Recommended action	Responsible
An HR user cannot open Office Operation Expenses, Admin Expenses or the HR Expense Report.	Those three are granted to named individuals; the HR role alone grants nothing.	Confirm against §4.2. If the person genuinely needs access, raise it with the platform's technical owner — it cannot be granted from Role Management.	***To be confirmed***
The attendance screen will not open.	The attendance module has been retired.	No action in MatrixIQ. Confirm where attendance is tracked instead.	HR
Birthdays and anniversaries cannot be found in the HR module.	They are on the main dashboard, not an HR page.	Open the MatrixIQ dashboard and read the Celebrations panel.	—
The **+ Add Entry** button is missing on Reimbursement.	The month is outside the add window, or the sheet is already submitted.	Read the hint beside the toolbar. If the sheet is submitted, a reviewer must request changes before it can be edited.	Employee with their manager
Submit is disabled.	The expense month is not over.	Wait until the first of the following month. The screen states when it becomes submittable.	Employee
An entry will not save — a bill is demanded.	Bill proof is required for everything except Conveyance by 2 Wheeler or 4 Wheeler.	Attach the bill, or check that the Conveyance vehicle type is set correctly.	Employee
A Conveyance amount cannot be typed.	It is calculated from distance × rate for 2 Wheeler and 4 Wheeler.	Correct the kilometres. Use *Cab* if the real cost is a fare rather than a distance allowance.	Employee
A sheet shows "Sent to HR" with no manager name.	It was created by a department manager, so manager review was skipped.	Expected behaviour. No action.	—
A bill cannot be opened on an older claim.	Its file was lost from an earlier file store.	Use the missing-bills panel on the Reimbursement screen to re-upload the original — this works even on approved claims.	Employee, prompted by HR / Accounts
A reimbursement was approved but never paid.	It is waiting in the Accounts queue, or has been put on hold.	Ask Accounts to check the queue and any hold reason. HR cannot settle it.	Accounts
Nobody can approve a travel request.	The relevant department has no manager configured, or has been renamed so the routing rule no longer matches.	Check Department Master for the traveller's department, HR and Administration. Admin and Super Admin can act meanwhile.	Super Admin / Admin

Problem	Likely cause	Recommended action	Responsible
"*Only HR can review this request*" or "*Only Admin can approve this request*".	You are not listed as a manager of that department.	Ask an Administration colleague to confirm the manager list, or have an authorised approver act.	Super Admin / Admin
Travel is approved but no tickets appear.	The Accounts booking stage has not been completed.	Ask Accounts. HR cannot book.	Accounts
An admin expense never reached Accounts.	It is still Pending Approval. Only approved entries are swept into a month's sheet.	Have the named approver sign it off.	The named approver
An office expense entry was deleted by mistake.	This register does not keep a recoverable copy.	Re-enter it from the bill. The serial number will differ.	The named grantee
A period report splits one category in two.	The category or expense head was renamed; past entries keep the old text.	Combine the figures manually, and in future add a new value at a period boundary rather than renaming.	The named grantee
A warning was raised for a day the employee was on leave.	No leave claim was raised, or it was rejected and the policy reinstated the obligation.	Waive the warning with a reason, or have the employee raise the claim and decide it.	HR manager
An HR user cannot decide a leave claim.	They hold the HR role but do not manage the HR department.	Have an HR department manager, Admin or Super Admin act.	HR manager
HR cannot edit another department's daily report.	Deliberate. HR reads company-wide but manages only its own department.	Ask that department's manager, or escalate to Admin.	Dept. manager / Admin
Employees in a department cannot file a daily report.	No report format is assigned to that department.	Ask Administration to assign one in Daily Report Configuration.	Super Admin / Admin
No reminders are being sent.	The scheduler is off, or dry run is still on.	Ask Administration to check both switches and the scheduler run history.	Super Admin / Admin

12 Best Practices and Compliance

12.1 Mandatory MatrixIQ rules

Rule	Enforcement
A reimbursement sheet cannot be submitted until its month is over.	The submit control is disabled, with the reason shown.
New claims may only be added for the current or previous month.	The add controls are hidden, with a hint. Lifted on a sheet sent back for changes.
Bill proof is required except for Conveyance by 2 Wheeler or 4 Wheeler.	The entry will not save.
At least the claimant must be named on a claim.	Refused: "*Add at least yourself.*"
Remarks are required when requesting changes.	The decision will not submit.
Only Accounts may complete a travel ticket booking.	Refused for anyone else.
Each travel stage acts only on a request at the preceding status.	Refused with a message naming the expected stage.
Office expense entries require date, office location, category, expense head, paid-by and a positive amount.	Refused with the specific missing field named.
Office expense category and head values are checked against the configured lists.	A value not on the list is refused.
Only approved admin expenses reach Accounts.	Unapproved entries are excluded from the month's sheet.
A date covered by a live leave claim is never counted as missing.	Automatic.
A second leave claim cannot be raised for a date that already has a live one.	Refused with an explanatory message.
A leave decision requires a reason.	The dialog will not submit.
Waiving a warning requires a reason and does not delete the record.	Enforced.
HR reads every department's daily reports but may edit and file only in its own.	Enforced per employee, from their current department.
Deleting an approved claim requires a written reason and a typed confirmation, and is permanent.	Enforced.

12.2 Recommended practice

Accurate data entry

- Enter claims as they happen, not in a rush at month end. The add window gives you two months, no more.
- Choose the most specific description. *Other* makes a claim harder to review and harder to report on.

- Record the real kilometres. The amount follows from them, and a round number invites scrutiny.
- In the office register, use **Description** to record the bill or invoice number — there is nowhere else to put it.

Documents

- Attach a legible bill. If a photograph is poor, replace it rather than leaving it.
- Attach HR documents at the travel review stage where the trip needs supporting paperwork.
- Keep office expense bills outside MatrixIQ, filed so that a register row can be matched to one. ***Retention requirement: to be confirmed.***

Timely approvals

- Clear **Pending Approvals** at a fixed point each week. A sheet held at a manager delays the employee's money, not the manager's.
- Decide leave claims promptly — a pending claim is excusing a date that may not deserve it.
- Clear pending admin expense approvals before each month end, or they miss the month's sheet.
- Verify travel bookings as soon as Accounts completes them, while the trip can still be corrected.

Confidentiality and access control

- Treat every screen here as confidential. Do not leave a reimbursement list or a warnings tab visible on a shared screen.
- Never share an account. Every decision is attributed to the signed-in user.
- Discuss an individual's claims, travel or warnings only with the people who must act on them.
- Keep the named-individual grants narrow. If someone no longer needs the office or admin expense registers, have the grant removed.

Avoiding duplicates

- Check the month's existing entries before adding a claim, especially after a change request.
- A shared meal should be one entry naming everyone present, not one entry per person.
- In the office register, search the month before recording a recurring bill such as rent or electricity.

Keeping an auditable history

- Use change requests rather than deletion. A change request leaves a trail; deletion destroys one.
- Write decision remarks that will still make sense in six months.
- Waive warnings with a specific reason, never a generic one.
- Record who authorised an extension to a month's reimbursement deadline.

13 Quick Reference

13.1 Frequently performed tasks

Claim an expense

Reimbursement → set month → **+ Add Entry** → date, description, who was present, amount, bill → save.

Send the month in

Reimbursement → check the total and bills → **Submit to Manager for Approval**. Only once the month is over.

Approve a team member's sheet

Reimbursement → **Pending Approvals** → open → check bills → approve, or request changes with remarks.

Give the month more time

Reimbursement → deadline line → **Extend this month's deadline** → new day → Save.

Request travel

Travel Schedule → **New Travel Request** → route, dates, purpose, projects → save → **Submit for Approval**.

Verify a completed booking

Travel Schedule → open a *Ticket Booked* request → check tickets and actual cost → **Verify & Confirm**, or **Send Back**.

Record office spend

Office Operation Expenses → **+ Add Expense** → date, office, category, expense head, paid by, amount → save.

Log a company-paid cost

Admin Expenses → type → dates or route → total → select employees → check the Split Preview → save → have it approved.

Answer "what did we spend on travel last quarter?"

HR Expense Report → period → Quarterly → choose sources → group by department → export.

Decide a leave claim

Daily Report Review → **Leave Claims** → Pending → Approve or Reject with a reason.

13.2 Key status transitions

Workflow	Transitions
Reimbursement	Draft → Awaiting Manager Approval → Manager Approved (or *Sent to HR*) → HR Approved → Payment Completed Either approver may return it as *Changes Requested*.
Travel Schedule	Draft → Submitted → Manager Approved → HR Reviewed → Admin Approved → Ticket Booked → Completed Any stage may return it as *Changes Requested*; HR may send it back three ways at final verification.
Admin Expense	Pending Approval → Approved → grouped into the month's sheet → Paid
Office Operation Expense	Recorded → grouped into the month's sheet → Paid
Leave claim	Pending → Approved, or Pending → Rejected
Warning	Active → Waived

13.3 Who does what

Stage	Role
Reimbursement — first approval	The claimant's department manager
Reimbursement — second approval	HR department manager
Reimbursement — payment	Accounts
Travel — first approval	The traveller's department manager
Travel — second approval	HR department manager
Travel — third approval	Administration department manager
Travel — booking	Accounts
Travel — final verification	HR department manager
Admin expense — sign-off	The single named approver
Leave claims and warnings	HR department manager
Report formats, deadlines, exemptions	Super Admin / Admin, in Daily Report Configuration

14 Glossary and Appendix

14.1 Glossary

Add window

The rule limiting brand-new reimbursement claims to the current or previous month. Lifted on a sheet sent back for changes.

Admin Expense

A cost the company pays directly on employees' behalf — hotel, tickets, visa — often split across several people.

Batch

One admin expense entry covering several employees, created and approved as a unit. It is no longer the unit of *payment*, which is the calendar month.

Celebrations

The dashboard panel showing upcoming birthdays and work anniversaries.

Change request

A reviewer returning a sheet or request to its owner with remarks, rather than refusing it outright.

Conveyance

Travel by the employee's own vehicle, claimed per kilometre: ₹4 for a 2 Wheeler, ₹8 for a 4 Wheeler. A Cab is claimed at actual cost with a bill.

Department manager

Someone listed as a manager of a department in Department Master. This relationship, not a role, drives approval routing.

Expense Head

The second classification level on an office operation expense — what the money was for. Editable in the application.

HR manager

A manager of the department whose name begins with "HR". Holds the HR decision in reimbursement, travel and daily report review.

Leave claim

An employee's request that a particular date be excused from daily reporting.

Named-individual grant

Access granted to particular usernames rather than to a role. Used for the three HR and Administration spend modules.

Paid By

On an office operation expense, who fronted the money. A short list of named payers plus a free-text option.

Sheet (reimbursement)

One employee's claims for one calendar month, approved and paid as a single unit.

Sheet (monthly expense)

For office and admin expenses, all qualifying entries for one calendar month grouped into a single payable item for Accounts.

Sweep

The scheduled job that checks who has filed a daily report, sends reminders and raises warnings. Safe to repeat.

Voucher

The Excel document produced from a month's reimbursement sheet.

Warning (missed report)

A record that an employee did not file on a working day. Can be waived with a reason; the record is kept.

14.2 Appendix A — Reimbursement cycle checklist

Who	☐	Check
Employee	☐	Every claim for the month has been entered.
	☐	Each claim has a bill, unless it is Conveyance by 2 or 4 Wheeler.
	☐	Everyone present is named on shared claims.
	☐	The monthly total is correct.
	☐	Submitted before the deadline shown on screen.
Department manager	☐	Each claim is a genuine business expense for this team.
	☐	Bills have been opened, not merely assumed present.
	☐	Remarks written where changes are requested.
HR	☐	Claims are within policy and at the correct rates.
	☐	No duplicate of a claim already in another month.
	☐	No claim already covered by an Admin Expense.
	☐	Approved, so the sheet reaches the Accounts queue.

14.3 Appendix B — Travel request checklist

☐	Check
☐	Origin, destination, arrival date and departure date are entered.
☐	Every project to be visited is linked.
☐	Purpose is specific; *Others* carries a written purpose.
☐	Companions and non-user co-travellers are listed.
☐	Hotel requirement captured with area and dates, if needed.
☐	Advance requested with an amount and reason, if needed.
☐	HR has recorded an estimated cost at the review stage.

☐	Check
☐	Accounts has attached the ticket documents.
☐	Actual cost has been compared with the estimate at final verification.

14.4 Appendix C — Cross-module handoffs

From	To	Handoff condition	What travels
Employee	Department manager	Sheet submitted	The month's claims and bills.
Department manager	HR	Manager approval	The sheet plus the manager's remarks.
HR	Accounts	HR approval	The sheet becomes a payable item.
Employee	Manager → HR → Administration	Travel submitted	Route, dates, purpose, projects, hotel and advance requests.
Administration	Accounts	Admin approval	The approved trip and its estimated cost.
Accounts	HR	Booking completed	Booking details, ticket documents, actual cost.
Office / Admin expense register	Accounts	Unpaid (office) or approved and unpaid (admin)	One monthly sheet each.
