NANTA

MATRIXIQ · DEPARTMENT OPERATING MANUAL

Marketing Module

Marketing requests from brief to delivery, and the shared materials library that publishes to channel partners.

STANDARD OPERATING PROCEDURE

Department / Module	Marketing — Marketing Requests (`marketing-requests`), Materials (`materials`)
Document type	Standard Operating Procedure
Version	1.0
Preparation date	27 October 2026
Document owner	To be confirmed
Approved by	To be confirmed
Review frequency	To be confirmed
Classification	Internal Use
Platform	MatrixIQ 1.0.0 — NANTA TECH LIMITED

Prepared from the *MatrixIQ Feature Reference* (13 pages) and verified against the MatrixIQ application itself on 27 October 2026. This module publishes documents to external channel partners. Read §6.6 before marking anything shared.

01 Cover Page

The cover of this document carries its identity. It is reproduced here so that a printed or extracted section can still be traced back to the correct version.

DOCUMENT IDENTITY

Attribute	Value
Title	MatrixIQ — Marketing Module SOP
Platform	MatrixIQ, the internal business platform of NANTA TECH LIMITED
Module coverage	Marketing Requests and Materials, plus the partner-facing side of both as a cross-reference
Document type	Standard Operating Procedure
Version	1.0 — first issue
Preparation date	27 October 2026
Document owner	To be confirmed
Classification	Internal Use

02 Document Control

2.1 Purpose of this document

This SOP explains how marketing work is requested, assigned, produced, technically reviewed and delivered inside MatrixIQ, and how the shared materials library is curated and selectively published to channel partners.

It is written for three audiences at once: the colleague who needs a brochure, the marketing team member who makes it, and the technical reviewer who checks that the specifications on it are right. Because requests also arrive from external channel partners, it explains what partners see of this process and what they do not.

2.2 Version history

Version	Date	Author	Summary of change
1.0	27 October 2026	To be confirmed	First issue. Prepared from the MatrixIQ Feature Reference and verified against the live application.

2.3 Ownership and approval

Role	Name	Responsibility
Document owner	To be confirmed	Keeps this document accurate as the Marketing modules change.
Approver	To be confirmed	Signs off each version before it is issued.
Reviewers	To be confirmed	Marketing, Technical and Sales representatives.
Review frequency	To be confirmed	Re-review is also required if the Marketing department's managers change, since they hold every approval in this module.

2.4 Intended audience

- **Primary —** The Marketing team: members who produce the work and managers who approve, assign and commit timelines.
- **Primary —** Anyone who raises a marketing request — Sales, Technical, Operations, Administration.
- **Secondary —** Technical team members who perform technical review on marketing material.
- **Reference —** Partner-facing colleagues who need to know what collateral is published externally.

2.5 Scope and limitations

In scope. The Marketing Requests workflow end to end, the Materials library, and the partner publication rule.

Out of scope. Brand guidelines, creative standards, external agency management, and the Partner Portal's own screens — those are in the Partner Portal SOP.

- MatrixIQ stores a *link* to a document in most cases, not the file itself. Access in the source system is a separate matter — see §6.6.
- Approval authority resolves from the Marketing department's managers in Department Master. A change there changes who may approve.
- Details the application could not confirm are marked ***To be verified in the live MatrixIQ application***.

> **IMPORTANT: THE WORKFLOW IS RICHER THAN THE SUMMARY**
>
> The *MatrixIQ Feature Reference* summarises the workflow as *submitted → assigned → accepted → in progress → technical review → delivered*. That is a fair reading of the shape, but it is not the vocabulary the application uses, and it omits the separate **approval** and **timeline** steps. §7 and §8 document the statuses the application actually records. Where this SOP and the reference differ, the application has been treated as the source of truth.

03 Introduction

3.1 What the Marketing module does

Marketing Requests turns "can you make me a brochure" into a tracked piece of work with an owner, a committed date and a reviewed result. Materials keeps everything that has already been made in one searchable place — and decides which of it channel partners may see.

A request begins as a structured brief: what is needed, for which product line, by when, with reference files attached. A Marketing manager reviews it, commits a delivery timeline, and assigns it to a team member who accepts or declines. The member prepares the work and — where the content makes technical claims — sends it to a named Technical team member for review. Once the technical decision is recorded, the final files are delivered to the original requester. A comment thread runs alongside throughout.

3.2 Why it exists

- **A brief that is actually complete.** The four-step wizard asks for the product line, the collateral type, the description, the priority and the deadline before anything is submitted.
- **A timeline that means something.** A delivery date is committed once by a manager and cannot afterwards be moved, so it is a commitment rather than an estimate.
- **Technical claims get checked.** Specifications on a datasheet are reviewed by the Technical team before the work is delivered.
- **Collateral stops being lost.** The Materials library organises documents in folders, by product and by category, and makes them searchable.
- **Partner publication is explicit.** Nothing reaches a channel partner unless someone deliberately marked it — and marked every folder above it.

3.3 What users can and cannot do

A Marketing team member can	A Marketing team member cannot
Raise a marketing request like anyone else.	Approve a request, assign it, or commit a delivery timeline — those are manager actions.
Accept or decline an assignment made to them.	Act on a request assigned to them until they have accepted it.
Prepare content, attach work and send it to technical review.	Act on a request assigned to somebody else.
Record the final submission and deliver it to the requester.	Record the technical decision — that belongs to the technical reviewer.
Add, organise and publish documents in the Materials library.	Change the delivery timeline once it has been committed.
Comment on any request they can see.	Cancel somebody else's request, unless they are privileged.

3.4 How Marketing connects to the rest of MatrixIQ

From Sales

`projects → marketing-requests`

A request can be linked to a sales project, so collateral is traceable to the deal that needed it.

To and from Technical

`marketing-requests`

A named Technical team member reviews the content and records an approval or a request for changes.

From the Partner Portal

`partner-marketing-requests`

Partner requests land in the same queue, badged as partner requests. They follow the same workflow.

To the Partner Portal

`materials → partner-materials`

A document marked *Share with partners*, inside a folder chain that is also shared, appears in the partner library.

From Administration

`department-master`

Who may approve, assign and set timelines is resolved from the managers of the *Marketing* department.

To the Audit Log

`audit-log`

Every status change on a marketing request is recorded with the user, time and IP address.

04 Access and Permissions

4.1 Who can open each module

Module	Who can open it
Marketing Requests	Every internal role — Super Admin, Admin, Manager, Sales, Marketing, Accounts, HR, Back Office, Engineer, and the Technical Project Management roles. It is a service desk the whole company uses.
Materials	The same internal roles. Everyone may read and search the library; curating it is narrower — see §4.3.

Partner accounts reach neither of these screens. They use their own Partner Portal equivalents, described in the Partner Portal SOP.

4.2 Who holds each decision on a request

Action	Who may perform it	Condition
Raise a request	Any internal user, and any channel partner through the portal	None.
Approve a request	**Marketing manager**	Only while the request is still awaiting review. "*Only the Marketing manager can approve this request.*"
Decline a request	Marketing reviewer / manager	Only while still awaiting review. A reason is required.
Set the delivery timeline	**Marketing manager**	Only on an approved request, and **only once**. It can never be changed afterwards.
Assign to a marketing member	Marketing reviewer / manager	"*Only a marketing reviewer/manager can assign members.*"
Accept or **decline** an assignment	Only the assigned marketing member	Only while the assignment is awaiting their confirmation. Declining requires a reason.
Change priority	Marketing reviewer / manager	—
Move the request through its working statuses	The assigned member, or a marketing reviewer / manager	The assigned member must have accepted the assignment first.
Send to technical review	The assigned member, or a marketing reviewer / manager	A Technical team member must be nominated. The assigned member must have accepted.
Record the technical decision	The nominated technical reviewer	Remarks are required when requesting changes.
Deliver the final files	The assigned member, or a marketing reviewer / manager	The assigned member must have accepted.

Action	Who may perform it	Condition
Cancel a request	The person who raised it, or a privileged account	**Only while the request is still awaiting review.** Once a timeline is committed, cancelling is refused.
Comment	Anyone who can see the request	—

4.3 Who counts as a "Marketing manager"

> **RESOLVED FROM THE ORGANISATION, NOT FROM A ROLE**
>
> A **Marketing manager** is whoever is listed as a manager of the **Marketing** department in Department Master. Accounts that see every department — Super Admin and Admin — also qualify. If no Marketing department is configured or it has no manager, MatrixIQ falls back to allowing any privileged account, so a request can never get permanently stuck.
>
> Holding the `marketing` role does **not** by itself make someone a Marketing manager. The role identifies the team; the department manager list identifies the approver.

4.4 Who may curate the Materials library

> **DELIBERATELY WIDER THAN APPROVAL AUTHORITY**
>
> Adding, renaming, re-describing and removing documents and folders is open to **anyone in the Marketing department**, plus everyone who qualifies as a Marketing manager. This is a deliberate separation: publishing collateral is ordinary team work, whereas approving other departments' requests, their timelines and their assignment is not. The two should not require the same grant.
>
> Everyone else with access to the module can **read and search** the library but not change it.

4.5 The partner boundary

Internal	Partner
Sees the full internal status vocabulary, the assigned member, the technical reviewer, internal remarks and prepared content.	Sees a deliberately coarser four-step position, their own submitted details, and the finished files once delivered. Nothing else.
Sees every document in the Materials library.	Sees only documents explicitly published, inside a folder chain that is also published.
Can assign, approve, review and deliver.	Can raise a request, comment on their own, and download delivered files.

> **PARTNER-FACING INFORMATION IS BUILT FROM AN ALLOW-LIST**
>
> What a partner sees of a marketing request is assembled from a fixed list of permitted fields — never by removing sensitive ones from the internal record. That is why adding a new internal field never accidentally exposes it. The practical consequence for you: **internal remarks, prepared content, technical instructions and the names of the assigned member and reviewer are never visible to a partner**, so write them as internal notes.

05 Module and Submodule Directory

5.1 Marketing Requests

Attribute	Detail
Module key	`marketing-requests`
Where it lives	Sidebar section **Marketing** → **Marketing Requests**; address `/marketing-requests`
Purpose	Request marketing support — brochures, banners, social posts and more — and track delivery timelines.
Intended users	Requesters from any department; the Marketing team; Marketing managers; nominated technical reviewers.
Main functions	Four-step request wizard · approve or decline · commit a delivery timeline · assign · accept or decline an assignment · change priority · prepare content · send to technical review · record the technical decision · final submission · deliver · comment thread · cancel.
Required inputs	Title, product category and a description of the requirement. Optionally: collateral type, priority, needed-by date, a linked sales project, attachments and additional information.
Outputs	Delivered final files and notes to the requester; audit entries; notifications and e-mail at lifecycle events.
Related modules	Project Dashboard (linked project), Partner Portal (partner requests), Materials (where finished collateral is filed), Audit Log.
Limitations	A committed delivery timeline cannot be changed. A request can only be cancelled or declined while it is still awaiting review. There is no export from this screen.

5.2 Materials

Attribute	Detail
Module key	`materials`
Where it lives	Sidebar section **Marketing** → **Materials**; address `/materials`
Purpose	The shared library of datasheets, case studies, brochures, presentations, certificates and videos.
Intended users	Everyone internal reads it. The Marketing department and Marketing managers curate it.
Main functions	Add a document by Drive link, by uploaded file, or by web link · organise into a folder tree · categorise by document type and group by product · search the whole library · publish to partners at document and folder level.
Required inputs	Product or document name, category, a destination folder, and the link or file.
Outputs	A searchable internal library, and a published partner library.

Attribute	Detail
Related modules	Partner Portal → Marketing Materials; Audit Log.
Limitations	For Drive and web links MatrixIQ stores the **link**, not the file — so access in the source system must be granted separately. Narrowing publication to specific partners is not available from this screen.

5.3 The partner-facing counterparts

Partner module	Relationship to this SOP
Marketing Requests (`partner-marketing-requests`)	Partners raise requests on the same form the internal team uses. They land in the same queue, badged as partner requests, and follow the workflow in §7. Partners see a four-step position, not the internal statuses. See the Partner Portal SOP.
Marketing Materials (`partner-materials`)	The published subset of the library in §6.7, with the same folder tree, category and product grouping, and search. Partners can open and download; they cannot add, edit or organise.

06 Detailed Step-by-Step Procedures

6.1 Raising a marketing request

Preconditions

- You are signed in with any internal account.
- You know what you need, for which product line, and by when.
- Any reference files — existing artwork, a specification, a client's brand sheet — are to hand.

Procedure — the four-step wizard

1. Open **Marketing** → **Marketing Requests** and start a new request.
2. **Step 1 — Request & Category.**
   - **Request Title *** — for example *Product Brochure for Smart City Tender*.
   - **Product Category *** — AV, Robotics, AI Video Analytics, System Integration, VisitIQ VMS or Other.
   - **Collateral Type** — Brochure / Flyer, Social Media Post, Banner / Standee Design, Video / Reel, Email Campaign, Website Update, Product Photography, Event Collateral, or Other.
   - **Description of Requirement *** — the brief. Describe the audience, the key specifications, dimensions, where it will be used and any branding notes.
   - **Related Sales Project (Optional)** — link the deal this is for.
3. **Step 2 — Priority & Deadline.**

Priority	What it signals
Urgent	Needed within a day or two.
High	Needed this week.
Medium	Needed in the next couple of weeks.
Low	No rush — whenever it fits the queue.

   Also set the **Required Deadline / Needed By Date (Optional)**.
4. **Step 3 — Files & Details.** Attach reference files, and add **Additional Information (Optional)** — client requirements, technical specifications, reference links or notes.
5. **Step 4 — Review & Submit.** Check the summary: product category, title, type, priority, required deadline, attachments, description and additional information. Submit.
6. A confirmation appears — *Request sent to Marketing!* — with the category and requester. From there you can **Submit Another Request** or **View All My Requests**.

> **WRITE THE BRIEF PROPERLY THE FIRST TIME**
>
> The quality of the description decides how many rounds the work takes. State the audience, the output size or format, where it will appear, and anything that must not change. Attaching an existing piece you want it to resemble saves more time than any amount of later comment.

SCREENSHOT PLACEHOLDER

[Insert screenshot: the four-step Marketing Request wizard at Step 1, Request & Category]

6.2 Reviewing, approving and declining

A new request arrives at **Submitted / Awaiting Marketing**. Requests from channel partners are badged as such in the queue.

6.2.1 Approving

1. Open the request and read the brief and attachments.
2. Select the approve action. Only a **Marketing manager** may do this, and only while the request is still awaiting review.
3. The status becomes **Approved**.

6.2.2 Committing the delivery timeline

1. On an **Approved** request, set the **expected delivery date**, with remarks if useful.
2. Save. The status becomes **Timeline Set**.

> **THE TIMELINE CAN BE COMMITTED ONLY ONCE**
>
> A delivery timeline is a real commitment, not a moving target. Once set it **cannot be changed**: MatrixIQ refuses with "*A delivery timeline has already been committed for this request and cannot be changed.*" Agree the date before you set it.
>
> It also has a second effect: **once a timeline exists the requester can no longer cancel the request.**

> **ORDER MATTERS — APPROVE AND SET THE TIMELINE BEFORE ASSIGNING**
>
> Setting a timeline requires the request to be at **Approved**. Assigning a request that is still at *Submitted* moves it straight to **Marketing In Progress** — past the point at which a timeline can be set. If a committed date is wanted, follow this order: **approve** → **set timeline** → **assign**.

6.2.3 Declining

1. Select the decline action on a request still awaiting review.
2. Enter a **reason**. It is required, and the requester reads it.
3. The status becomes **Declined**.

A request that has moved past the awaiting-review stage cannot be declined: "*Only a request still awaiting review can be declined.*" Use the comment thread and a conversation with the requester instead.

6.3 Assignment, acceptance and decline

6.3.1 Assigning to a marketing member

1. Open the request and choose a marketing member to assign it to.

2. Save. The assignment is recorded as **awaiting their confirmation**, and if the request was still at *Submitted* its status becomes **Marketing In Progress**.
3. Set or change the **priority** here if the queue has shifted.

Only a marketing reviewer or manager may assign. A Technical team member may also be nominated at this point as the eventual reviewer.

6.3.2 Accepting an assignment

1. The assigned member opens the request.
2. They select **accept**. The assignment is confirmed; the request's status does not change.

> **ACCEPTANCE IS A GATE, NOT A FORMALITY**
> Until the assigned member accepts, they cannot send work to technical review, cannot record a final submission, and cannot move the request through its working statuses. MatrixIQ refuses with "*You must accept this assignment before you can act on it.*" A manager or reviewer is never blocked by this.

6.3.3 Declining an assignment

1. The assigned member selects **decline**.
2. A **reason is required**: "*A reason is required to decline an assignment.*"
3. The request returns to **Submitted / Awaiting Marketing** and the assignment is marked declined, so a manager can reassign it.

Only the assigned member may accept or decline, and only while the assignment is awaiting their confirmation.

6.4 Doing the work and technical review

6.4.1 Working the request

The assigned member moves the request through working statuses as the job progresses. The actions available are:

Action	Moves it from	To
Start / Claim	Submitted, Timeline Set	Marketing In Progress
Wait for information	In Progress, Marketing In Progress	Waiting for Information — **a remark is required**
Resume	Waiting for Information	Marketing In Progress
Work on changes	Changes Requested (technical)	Marketing In Progress
Ready for review	In Progress, Marketing In Progress	Ready for Review
Reopen	Ready for Review	Marketing In Progress

Action	Moves it from	To
Marketing final review	Technical Approved, Changes Requested, Marketing In Progress	Marketing Final Review
Complete	Marketing Final Review, Technical Approved, Marketing In Progress, Changes Requested, In Progress, Ready for Review	Completed

> **WAITING FOR INFORMATION IS THE ONE STATUS THE REQUESTER MUST ACT ON**
> It is the only status that tells the requester the ball is in their court — and the only one surfaced to a channel partner as needing their action. Use it, with a clear remark, rather than letting a request sit in progress while you wait for an answer.

6.4.2 Sending work to technical review

1. Open the request. You must be the assigned member (and have accepted), or a marketing reviewer or manager.
2. Record the **prepared content**, attach the marketing files, and add any **marketing remarks**.
3. Add **technical instructions** — what specifically the reviewer should check.
4. Select the **Technical Team member** who will review. One must be nominated; MatrixIQ refuses otherwise.
5. Send. The status becomes **Pending Technical Review**.

If you are not the assigned member, MatrixIQ names who is: "*This request is assigned to [name]. Only the assigned marketing member can prepare content and send to Technical.*"

6.4.3 Recording the technical decision

1. The nominated technical reviewer opens the request and reads the prepared content, the attached files and the technical instructions.
2. They record one of two decisions:

Decision	Remarks	Resulting status
Approve	Optional	**Technical Approved**
Request changes	**Required**	**Changes Requested** — "*Please provide remarks detailing the requested technical changes.*"

3. On a change request, the marketing member uses **Work on changes** to return the request to Marketing In Progress, makes the corrections, and sends it to technical review again.

> **WHAT A TECHNICAL REVIEW IS FOR**
> It checks that the claims on the collateral are correct — model numbers, specifications, capabilities, compliance statements. It is not a design review. Write technical instructions that ask a technical question.

6.5 Delivery, cancellation and the comment thread

6.5.1 Delivering the final files

1. Once the content is right, record the **final submission**: the finished files and any notes for the requester.
2. Submit. The status becomes **Completed**, and the requester is notified.
3. File the finished collateral in the **Materials** library (§6.6) so it can be found again.

> **THE REQUESTER SEES NOTHING UNTIL YOU DELIVER**
>
> Final submission notes and files are a working draft right up to the moment of delivery. For a channel partner they are withheld entirely until the request is Completed, precisely so an in-flight draft is never mistaken for the deliverable. Do not treat the final-submission field as a place to share work in progress — use the comment thread.

6.5.2 Cancelling a request

1. The person who raised the request — or a privileged account — opens it.
2. Select cancel. The status becomes **Cancelled**.

> **CANCELLATION CLOSES EARLY**
>
> A request can only be withdrawn **while it is still awaiting review**. Once a reviewer has committed to it, MatrixIQ refuses: "*This request already has a committed timeline and can no longer be cancelled.*" After that point, talk to Marketing and let them decline or close it — so that the commitment someone made is not silently undone.

6.5.3 Cancelled, Declined and Changes Requested — three different things

Outcome	Who ends it	Meaning
Cancelled	The requester	We no longer need this. Only possible before a timeline is committed.
Declined	A marketing reviewer	Marketing will not take this on, with a written reason the requester reads. Only possible before a timeline is committed.
Changes Requested	The technical reviewer	Not an ending — the work goes back to Marketing with remarks and continues.

6.5.4 The comment thread

Every request carries a comment thread. Use it for anything that is a conversation rather than a status change — clarifying a brief, sharing a draft for an opinion, agreeing a date before it is committed. Comments are visible to everyone who can see the request, which for a partner request includes the partner.

6.6 Materials — adding and organising

6.6.1 Adding a document

1. Open **Marketing** → **Materials**.

2. Start a new document and complete:
   - **Product / Document name *** — for example *Allbotix X200*. Everything filed under the same name appears as one entry, which is how several documents for one product are grouped.
   - **Category *** — see the table below.
   - **Where is this document? *** — the destination folder.
   - **Document name** and **Description** — what it is for, and who it should go to.
3. Choose the source. There are **three**:

Source	What you provide, and what to check
Drive link	A Google Drive file or folder address. **MatrixIQ stores the link, not the file.** Anyone opening it needs access in Drive — if it is set to *Restricted*, share it with the team first.
Upload a file	The file itself is uploaded to MatrixIQ. Use this where Drive access cannot be relied on.
Web link	Any web address, including a video. **MatrixIQ stores the link, not the page.** Open it in a private window before adding it — if it needs a sign-in the team does not have, the link will lead nowhere.

4. Save.

> **REFERENCE CLARIFICATION**
>
> The *Feature Reference* describes Materials as "add a document by Drive link". The application supports **three** sources — Drive link, uploaded file, and web link. Choose deliberately: a link is only as reliable as the permissions on the thing it points at.

6.6.2 Categories

Category	What belongs in it
Datasheet	Technical specifications, one per product.
Case Study	Installations and success stories, by client or site.
Company Profile	The corporate profile and overview decks.
Brochure	Product brochures, catalogues and leaflets.
Presentation	Decks.
Certificate	Certifications and compliance documents.
Video & Images	Video and image assets.
Other	Anything that does not fit the above.

Datasheet and Case Study lead the list because they are what people come to the library for. Each category carries a hint on screen describing what belongs in it, so that two people filing the same document choose the same place.

6.6.3 Folders

1. Create a folder with a **Folder name *** — for example *Robots* — and a **Description** saying what belongs in it.

2. Folders nest, so a tree can be built: product line, then sub-line, then document type.
3. Move documents into the right folder as the library grows.

6.6.4 Finding something

Use the search box — it matches by product, document and description — or browse the **Folders** tree. Documents are grouped by product name and tabbed by category.

6.7 Materials — sharing with partners

READ THIS SECTION FULLY BEFORE PUBLISHING ANYTHING

Publishing a document makes it available to **external companies**. Internal sales decks, pricing, competitor comparisons and anything commercially sensitive must never be marked shared.

6.7.1 The two-gate rule

BOTH GATES MUST BE OPEN

A document is visible to a partner only if **both** are true:

1. The document itself is marked **Share with partners**; *and*
2. **Every folder on its path to the top** is also shared.

The second condition is the one that is easy to get wrong. It is not enough to share the immediate parent: a shared *Datasheets* folder sitting inside an unshared *Internal* folder stays hidden — which is exactly the behaviour you want, because the boundary Marketing drew must be the boundary that holds. A document at the top level, in no folder at all, is governed by its own setting alone.

If the folder structure is ever broken or circular, publication **fails closed**: nothing is published. A library whose structure is corrupt must not default to publishing.

6.7.2 Publishing a document

1. Open the document for editing.
2. Tick **Share with partners**. The on-screen note confirms: "*Publishes this document to the Partner Portal's Marketing Materials library.*"
3. If the folder is not yet shared, MatrixIQ warns you immediately: "*This folder is not shared with partners yet, so the document still won't appear for them. Share the folder too — and every folder above it.*" Act on that warning; ticking the document alone achieves nothing.
4. Save.
5. **Verify.** Ask a partner contact, or someone who can see the partner library, to confirm the document is visible — and, just as importantly, that nothing else has become visible alongside it.

6.7.3 Publishing a folder

1. Open the folder for editing.
2. Tick **Share this folder with partners** and save.
3. Repeat for every folder above it, up to the top.

SHARING A FOLDER OPENS THE PATH, NOT THE CONTENTS

Marking a folder shared satisfies the second gate for the documents inside it. Each document still needs its own **Share with partners** tick. So sharing a folder does not publish everything in it — but it does mean that anything in it which is *already* individually ticked becomes visible at that moment. Before sharing a folder, check what inside it is already marked.

6.7.4 Unpublishing

Untick **Share with partners** on the document, or unshare any folder on its path. Either closes a gate and removes it from the partner library.

UNPUBLISHING DOES NOT RECALL WHAT HAS BEEN DOWNLOADED

A partner who has already opened or downloaded a document still has it. Unpublishing stops future access; it is not a retraction. If something was published in error, unpublish immediately *and* tell whoever owns the partner relationship.

6.7.5 Narrowing publication to specific partners

NOT AVAILABLE FROM THIS SCREEN

MatrixIQ can restrict a published document to **particular partner companies** rather than all of them. **No control for this was found on the Materials screen** — the on-screen tick is a simple on or off, and in practice a published document is visible to every partner. Whether per-partner publication can be configured by another route is ***To be verified in the live MatrixIQ application***.

Plan on the assumption that publishing means "every partner". Do not publish a document intended for one partner only.

07 Workflow and Approval Process

7.1 The main path

7.2 Branches and exceptions

BEFORE REVIEW **Declined**

By: a marketing reviewer · **Reason:** required · **Only from:** Submitted · **Terminal.**

↓

BEFORE REVIEW **Cancelled**

By: the requester, or a privileged account · **Only from:** Submitted · **Terminal.**

> **Blocked once a timeline is committed:** "*This request already has a committed timeline and can no longer be cancelled.*"

↓

ASSIGNMENT **Assignment declined**

By: the assigned member · **Reason:** required · **Result:** returns to Submitted for reassignment.

↓

IN FLIGHT **Waiting for Information**

By: the assigned member or a reviewer · **Remark:** required · **Result:** the ball is with the requester. *Resume* brings it back.

↓

TECHNICAL **Changes Requested**

By: the technical reviewer · **Remarks:** required · **Result:** back to Marketing. *Work on changes* returns it to Marketing In Progress; it can then be sent for technical review again.

↓

DELIVERY **Completed**

By: the assigned member or a reviewer · **Carries:** the final files and notes, released to the requester at this moment.

7.3 Automatic versus manual

Event	Automatic?	Who acts
A partner request entering the internal queue, badged as a partner request	**Automatic**	—

Event	Automatic?	Who acts
Status moving to Marketing In Progress when a Submitted request is assigned	**Automatic**	—
The overdue flag, from the committed delivery date or the needed-by date	**Automatic**	— recomputed each time the queue is read.
Collapsing the internal status into the four-step partner view	**Automatic**	—
Final files becoming visible to a partner on completion	**Automatic**	—
Approving, declining, setting the timeline, assigning	**Manual**	Marketing manager / reviewer
Accepting or declining an assignment	**Manual**	The assigned member
Sending to technical review; recording the decision	**Manual**	Assigned member; technical reviewer
Delivering; cancelling	**Manual**	Assigned member; requester
Publishing a document to partners	**Manual**	Marketing team member
Audit entry on every status change	**Automatic**	—

7.4 Responsibilities at a glance

Role	Responsible for
Requester	A complete, accurate brief; answering promptly when the request is Waiting for Information; cancelling early if the need disappears; accepting delivery.
Marketing manager	Approving or declining with a reason; committing a realistic delivery timeline *once*; assigning to the right member; setting priority; keeping the queue moving.
Assigned marketing member	Accepting or declining promptly with a reason; producing the work; writing useful technical instructions; acting on technical feedback; delivering the final files; filing the result in Materials.
Technical reviewer	Checking the technical accuracy of the content; recording a clear decision; giving specific remarks when requesting changes.
Materials curator	Filing documents correctly; keeping links working; deciding what is published to partners and verifying the result.

08 Field and Status Reference

8.1 Marketing request statuses

Status on screen	Set by	Meaning
Submitted / Awaiting Marketing	The requester	New. The only status from which it may be approved, declined or cancelled.
Approved	Marketing manager	Accepted in principle. The only status from which a timeline may be committed.
Timeline Set	Marketing manager	A delivery date has been committed and can no longer be changed.
Marketing In Progress	Assigned member, or automatically on assignment	Work is under way.
Waiting for Information	Assigned member or reviewer, with a required remark	Blocked pending an answer from the requester.
In Progress	—	An alternative working status carried by some requests.
Ready for Review	Assigned member	Work is ready for an internal look. *Reopen* returns it to progress.
Pending Technical Review	Assigned member	With the nominated technical reviewer.
Technical Approved	Technical reviewer	The content is technically correct.
Changes Requested	Technical reviewer, with required remarks	Technical corrections are needed. Not an ending.
Marketing Final Review	Assigned member	Preparing the final submission for the requester.
Completed	Assigned member or reviewer	Delivered. Final files and notes are released. Terminal.
Declined	Marketing reviewer, with a required reason	Marketing will not take it on. Terminal.
Cancelled	The requester, or a privileged account	Withdrawn before review. Terminal.

8.2 How a partner sees the same request

Partner sees	Collapses these internal statuses
Submitted	Submitted, Approved, Timeline Set
In progress	Marketing In Progress, In Progress, Waiting for Information, Changes Requested

Partner sees	Collapses these internal statuses
In review	Pending Technical Review, Technical Approved, Marketing Final Review, Ready for Review
Completed	Completed
Not proceeding	Declined, Cancelled

> **WHY THE PARTNER VIEW IS COARSER**
>
> The internal vocabulary names who is holding the ticket — *Pending Technical Review*, *Changes Requested*, *Marketing Final Review*. That tells a partner about our internal handoffs and, worse, reads as a problem on their side when it is entirely routine. *In review* says the true thing without the organisation chart.
>
> Note that the first partner-facing label is **Submitted**, not "Received" as the reference describes.

8.3 Request fields

Field	Required	Notes
Request Title	Required	Short and specific.
Product Category	Required	AV, Robotics, AI Video Analytics, System Integration, VisitIQ VMS, Other. Colour-coded in the queue.
Collateral Type	Optional	Nine options — see §8.4.
Description of Requirement	Required	The brief.
Related Sales Project	Optional	Links the request to a deal.
Priority	*To be verified*	Urgent, High, Medium, Low. Changeable later by a reviewer.
Required Deadline / Needed By Date	Optional	The requester's wish. Distinct from the committed delivery timeline.
Attachments	Optional	Reference files.
Additional Information	Optional	Client requirements, specifications, reference links.

Internal-only fields set later: prepared content, marketing attachments, marketing remarks, technical instructions, the technical decision and remarks, the final submission notes and files, and the decline or rejection reason. **None of the internal workspace fields are ever visible to a partner.**

8.4 Collateral types and priorities

Collateral type	Priority
Brochure / Flyer · Social Media Post · Banner / Standee Design · Video / Reel · Email Campaign · Website Update · Product Photography · Event Collateral · Other	**Urgent** — within a day or two **High** — this week **Medium** — next couple of weeks **Low** — whenever it fits

8.5 When a request is flagged overdue

A request is overdue when the current date has passed its **committed delivery date**, or — where no timeline was committed — its **needed-by date**. Requests that are Completed, Declined or Cancelled are never flagged. The flag is recomputed each time the queue is read, so it is always current.

8.6 Materials fields

Field	Required	Notes
Product / Document name	Required	Groups everything filed under the same name into one entry.
Category	Required	One of the eight in §6.6.2.
Where is this document?	Required	The destination folder.
Google Drive link / File / Web link	Required	Exactly one, depending on the source chosen.
Document name	*To be verified*	The individual document's own label.
Description	Optional	What it is for, and who it should go to.
Share with partners	Optional	A tick. Only effective when every folder above is also shared.
Folder name	Required	On a folder.
Share this folder with partners	Optional	Opens the path for documents inside that are themselves ticked.

09 Reports, Downloads and Exports

Output	Format	Who	Contents
Request statistics	On screen	Anyone with the module	Counts and breakdowns across the request queue.
Delivered final files	As uploaded	The requester; a partner once Completed	The finished collateral.
Reference attachments	As uploaded	Anyone who can see the request	What the requester supplied.
Materials library documents	Drive link, uploaded file or web link	Internal readers; partners for published items	The collateral itself, or a link to it.
Audit trail for a request	PDF of a page	**Super Admin / Admin only**	Status changes with user, time and IP. From Administration → Audit Log.

NO CSV OR EXCEL EXPORT FROM THESE SCREENS

Neither Marketing Requests nor Materials offers a spreadsheet export. Figures for reporting must be read from the on-screen statistics, or obtained from an Administration colleague. ***Whether a request export exists elsewhere: to be verified in the live MatrixIQ application.***

9.1 Search and filtering

- **Marketing Requests** — the queue can be read by status, priority and product category, with partner requests badged. Overdue requests are flagged automatically.
- **Materials** — search by product, document or description; browse the folder tree; filter by category tab and product grouping.

10 Notifications and Follow-Ups

10.1 What MatrixIQ sends

Event	Who is notified	What they must do
A request is submitted	Marketing reviewers / managers	Review, approve or decline, commit a timeline, assign.
A request is assigned	The assigned marketing member	**Accept or decline.** Nothing can proceed until they do.
An assignment is declined	Marketing reviewers / managers	Reassign.
A request is sent to technical review	The nominated technical reviewer	Review and record a decision.
A technical decision is recorded	The assigned marketing member	Proceed, or work on the requested changes.
A request moves to Waiting for Information	The requester	**Answer the question.** This is the one status that needs them.
A request is completed	The requester, including a partner	Collect the final files.
A request is declined or cancelled	The requester, or Marketing	Read the reason.
A comment is added	Participants on the request	Read and reply where needed.

Lifecycle events generate an in-app notification and, where configured, an e-mail. MatrixIQ also raises reminders on marketing requests as their timeline approaches.

10.2 How e-mail behaves

> **E-MAIL CAN FAIL SILENTLY**
>
> Mail is sent through Amazon SES using server settings. If those are not provisioned, MatrixIQ skips the send and continues without an error. **The request queue is the reliable work list** — open it, do not wait to be told.

10.3 What to do when a notification needs action

You are told…	Do this
A request has been assigned to you	Open it, read the brief, and accept or decline **the same day**. Declining with a reason is better than sitting on it.
Technical changes have been requested	Use **Work on changes**, make the corrections, and send it back to technical review.
A request you raised is Waiting for Information	Read the remark and answer in the comment thread. The work is stopped until you do.

You are told…	Do this
A request you raised has been delivered	Download the files and confirm they are what you needed. Ask in the comment thread if not.
A request is overdue	If you are the assigned member, say why in the comment thread. If you are the manager, re-prioritise or reassign.

11 Common Problems and Troubleshooting

Problem	Likely cause	Recommended action	Responsible
"*Only the Marketing manager can approve this request.*"	You hold the Marketing role but are not listed as a manager of the Marketing department.	Ask a Marketing department manager, or an Admin, to act. Managership is set in Department Master.	Super Admin / Admin
The timeline cannot be set.	The request is not at **Approved** — most often because it was assigned first, which moved it to Marketing In Progress.	Follow the order: approve → set timeline → assign. For a request already past that point, agree the date in the comment thread instead.	Marketing manager
The timeline is wrong and will not change.	A committed timeline cannot be edited, by design.	Record the revised date in the comment thread and tell the requester directly.	Marketing manager
A request cannot be cancelled.	A timeline has been committed.	Ask Marketing to close it. Cancellation is only available before review.	Requester with Marketing
A request cannot be declined.	It has moved past the awaiting-review stage.	Discuss it in the comment thread and agree how to close it.	Marketing
"*You must accept this assignment before you can act on it.*"	The assignment is still awaiting your confirmation.	Accept it, then proceed.	Assigned member
"*This request is assigned to [name].*"	You are not the assigned member.	Ask a manager to reassign it, or let the named member act.	Marketing manager
A request cannot be sent to technical review.	No Technical team member has been nominated, or the person selected was not found.	Select a valid Technical team member and send again.	Assigned member
A technical change request will not save.	Remarks are required when requesting changes.	Write specific remarks describing the technical corrections needed.	Technical reviewer
A partner says they cannot see a published document.	The two-gate rule — a folder on the path is not shared.	Share every folder from the document up to the top, then verify. The screen warns about this when you tick the document.	Marketing curator
A document was published to partners by mistake.	Ticked without checking the folder context.	Untick it immediately. **Then tell whoever owns the partner relationship** — unpublishing does not recall what has been downloaded.	Marketing curator + partner manager
Sharing a folder exposed more than intended.	Documents inside were already individually ticked and became visible the moment the path opened.	Unshare the folder, audit what is ticked inside it, then share again.	Marketing curator

Problem	Likely cause	Recommended action	Responsible
A Drive or web link leads nowhere.	MatrixIQ stores the link, not the file. Permissions in the source system have changed.	Fix the sharing in Drive, or re-add the document as an uploaded file.	Marketing curator
A document cannot be found in the library.	It is filed under a different product name or category.	Use the search box, which matches product, document and description, before concluding it is missing.	Anyone
A marketing team member cannot add a document.	They are not in the Marketing department and are not a Marketing manager.	Confirm their department in User Management. Curation is open to the whole Marketing department.	Super Admin / Admin
A partner request looks stalled.	It may be Waiting for Information, which the partner sees as needing their action.	Check the status and the comment thread; chase the partner through their relationship manager.	Marketing + partner manager
Nobody can approve anything — the queue is stuck.	No Marketing department, or no manager configured for it.	Any privileged account can act as the fallback. Have Administration configure a Marketing manager properly.	Super Admin / Admin

12 Best Practices and Compliance

12.1 Mandatory MatrixIQ rules

Rule	Enforcement
Only a Marketing manager may approve a request or commit a delivery timeline.	Refused with a message naming the restriction.
A delivery timeline may be committed only once and never changed.	Refused on a second attempt.
A timeline may be set only on an **Approved** request.	Refused otherwise.
A request may be declined or cancelled only while awaiting review.	Refused once a timeline is committed.
Declining a request or an assignment requires a reason.	Refused without one.
The assigned member must accept before acting.	Refused with "*You must accept this assignment before you can act on it.*"
Only the assigned member may act on a request assigned to them, unless a manager or reviewer.	Refused, naming the assignee.
Sending to technical review requires a nominated Technical team member.	Refused otherwise.
A technical change request requires remarks.	Refused without them.
Moving a request to Waiting for Information requires a remark.	Refused without one.
A document reaches partners only if it **and every folder above it** are shared.	Enforced at the point the partner library is read. Fails closed on a broken structure.
Final files are withheld from a partner until the request is Completed.	Enforced.
Internal workspace fields are never sent to a partner.	Partner payloads are built from a fixed allow-list of fields.

12.2 Recommended practice

Accurate briefing and data entry

- Write the brief as if the person reading it has never seen the product. State audience, format, size and where it will appear.
- Choose the most specific collateral type. *Other* makes the queue harder to plan.
- Link the sales project where one exists — it is how collateral gets traced back to the deal that needed it.
- Set a priority that is honest. If everything is Urgent, nothing is.

Attachments and documents

- Attach references at submission, not later in the comment thread.

- Prefer an **uploaded file** over a link when the document must remain readable regardless of anyone's Drive permissions.
- Open every web link in a private window before adding it to the library.
- File delivered collateral into Materials as the last step of every request.

Timely decisions

- Accept or decline an assignment the same day. Declining promptly with a reason is better than silence.
- Review the queue for overdue requests at a fixed point each week.
- Commit timelines you can keep. The date cannot be moved afterwards.
- Record technical decisions quickly — the work is stopped while they are pending.

Confidentiality and partner publication

- Before publishing, ask: would it be acceptable for **every** partner to have this? Assume publication means "all partners".
- Never publish pricing, internal sales decks, competitor comparisons or anything naming a client without that client's agreement.
- Review the published library periodically against what is still current. ***Review cadence: to be confirmed.***
- Write internal remarks as internal notes — but never write anything you would be uncomfortable with a colleague reading, since the comment thread is visible to everyone on the request, partners included on partner requests.

Avoiding duplicates

- Search Materials before raising a request. The thing may already exist.
- File documents for one product under one consistent product name — that is what groups them as a single entry.
- Do not raise a second request because the first is slow. Comment on the existing one.

Keeping an auditable history

- Use the comment thread rather than e-mail or chat. It is the only record attached to the request.
- Write decline and change-request reasons that will still make sense in six months.
- Record the final submission notes properly — they are what the requester reads alongside the files.

13 Quick Reference

13.1 Frequently performed tasks

Ask Marketing for something

Marketing Requests → new request → four steps: Request & Category, Priority & Deadline, Files & Details, Review & Submit.

Take a request on

Approve → set the delivery timeline → assign a member. **In that order.**

Start work

Accept the assignment first. Then prepare the content and attach the files.

Get the specifications checked

Record prepared content and technical instructions → nominate a Technical team member → send to technical review.

Hand the work over

Record the final submission — files and notes → deliver. The requester sees it at that moment, and not before.

Stop the clock while you wait

Move the request to **Waiting for Information** with a remark. **Resume** when the answer arrives.

Add collateral to the library

Materials → new document → product name, category, folder → Drive link, uploaded file or web link.

Publish to partners

Tick **Share with partners** on the document *and* on every folder above it → then verify in the partner library.

13.2 Key transitions

From	Action	To
Submitted	Approve (manager)	Approved
Approved	Set timeline (manager, once)	Timeline Set
Submitted / Timeline Set	Assign, or Start / Claim	Marketing In Progress
Marketing In Progress	Send to technical review	Pending Technical Review
Pending Technical Review	Approve (technical)	Technical Approved
Pending Technical Review	Request changes (technical, remarks required)	Changes Requested
Changes Requested	Work on changes	Marketing In Progress
Technical Approved	Marketing final review, then final submission	Completed
Submitted	Decline (reason required) / Cancel	Declined / Cancelled

From	Action	To
Assignment pending	Decline assignment (reason required)	Back to Submitted

13.3 Who does what

Action	Role
Raise, cancel (early), answer questions, accept delivery	Requester — any internal user or a channel partner
Approve, decline, set the timeline, assign, set priority	Marketing department manager
Accept or decline an assignment; produce and deliver the work	Assigned marketing member
Check technical accuracy and record the decision	Nominated Technical team member
Curate and publish the Materials library	Anyone in the Marketing department
Read the audit trail	Super Admin / Admin

14 Glossary and Appendix

14.1 Glossary

Allow-list
A fixed list of fields a partner is permitted to see. Partner-facing information is built from one, never by removing sensitive fields from the internal record.

Assigned member
The marketing team member a request has been given to. They must accept before they can act.

Collateral type
What kind of marketing output is wanted — brochure, social post, banner, video and so on.

Comment thread
The conversation attached to a request, visible to everyone who can see it.

Committed timeline
The expected delivery date set once by a Marketing manager. It cannot afterwards be changed, and its existence blocks cancellation.

Folder chain
The path from a document up to the top of the library. Every folder on it must be shared for the document to reach partners.

Fails closed
Where the folder structure cannot be resolved, nothing is published. The safe direction.

Marketing manager
Whoever is listed as a manager of the Marketing department in Department Master, plus accounts that see every department.

Needed-by date
The requester's wish. Distinct from the committed delivery timeline, which is Marketing's commitment.

Partner request
A marketing request raised from the Partner Portal. It enters the same queue, badged as such, and follows the same workflow.

Prepared content
The internal working field in which the assigned member records the draft before technical review. Never visible to a partner.

Technical instructions
What the assigned member asks the technical reviewer to check. Internal only.

Technical reviewer
The Technical team member nominated to check the technical accuracy of the content.

Two-gate rule
A document reaches partners only if the document is shared *and* every folder above it is shared.

14.2 Appendix A — Request brief checklist

☐	Check
☐	The title says what the piece is and what it is for.
☐	The correct product category is selected.
☐	The collateral type is specific, not *Other*.
☐	The description states the audience, the format or size, and where it will be used.
☐	Anything that must not change — a client's branding, a mandated disclaimer — is written down.
☐	Reference files are attached.
☐	The sales project is linked, if there is one.
☐	The priority is honest and the needed-by date is real.
☐	The Materials library has been searched — this may already exist.

14.3 Appendix B — Partner publication checklist

☐	Check
☐	The document contains nothing commercially sensitive — no internal pricing, no margins, no competitor comparison.
☐	Any client named in it has agreed to be named.
☐	It is the current version.
☐	It would be acceptable for **every** partner to hold it.
☐	**Share with partners** is ticked on the document.
☐	Every folder from the document up to the top is also shared.
☐	What else is already ticked inside those folders has been checked.
☐	The result has been verified in the partner library.

14.4 Appendix C — Cross-module handoffs

From	To	Handoff condition	What travels
Any department, or a channel partner	Marketing	Request submitted	Title, category, type, description, priority, deadline, attachments, linked project.
Marketing manager	Assigned marketing member	Assignment made	The request, awaiting acceptance.

From	To	Handoff condition	What travels
Marketing member	Technical team	Sent to technical review	Prepared content, marketing attachments, technical instructions.
Technical team	Marketing member	Decision recorded	Approval, or required changes with remarks.
Marketing member	The requester	Final submission delivered	Final files and notes — released only at this moment.
Marketing	Materials library	Work finished	The finished collateral, filed by product and category.
Materials library	Partner Portal	Document and full folder chain shared	The published document, with its category and product grouping.
Marketing Requests	Audit Log	Any status change	User, role, action, previous and new status, remarks, IP.

14.5 Appendix D — Items this document could not verify

Item	Status
Whether a published document can be narrowed to specific partner companies from any screen	***To be verified in the live MatrixIQ application***
Whether Priority is mandatory on the request wizard	***To be verified in the live MatrixIQ application***
Whether the individual Document name field is mandatory in Materials	***To be verified in the live MatrixIQ application***
Whether any spreadsheet export of marketing requests exists	***To be verified in the live MatrixIQ application***
Review cadence for the published partner library	***To be confirmed***
Whether the platform's e-mail service is provisioned in this deployment	***To be verified in the live MatrixIQ application***
Document owner, approver and review frequency	***To be confirmed***

END OF DOCUMENT — MATRIXIQ MARKETING MODULE SOP, VERSION 1.0
