NANTA

MATRIXIQ · CHANNEL PARTNER HANDBOOK

Partner Portal

Submit opportunities, request demonstrations, download quotations and marketing material, and raise support — all in one place.

STANDARD OPERATING PROCEDURE

Module	MatrixIQ Partner Portal — seven areas
Document type	Standard Operating Procedure — partner user guide
Version	1.0
Preparation date	27 October 2026
Issued by	NANTA TECH LIMITED
Document owner	To be confirmed
Review frequency	To be confirmed
Classification	**For channel partners, distributors and dealers** — may be shared with your authorised portal users
Platform	MatrixIQ 1.0.0

This guide describes the MatrixIQ Partner Portal as it stood on 27 October 2026. Screens and wording may be improved over time. If anything in this guide does not match what you see, please ask your relationship manager — what is on your screen is correct.

01 Cover Page

This guide is issued to you as an authorised channel partner of NANTA TECH LIMITED. You may share it with the colleagues in your company who hold their own portal accounts.

DOCUMENT IDENTITY

Attribute	Value
Title	MatrixIQ — Partner Portal SOP
Issued by	NANTA TECH LIMITED
Audience	Channel partners, distributors, dealers, and their authorised portal users
Module coverage	Dashboard, My Leads / Projects, Quotations, Demo Requests, Marketing Materials, Marketing Requests, Technical Support
Document type	Standard Operating Procedure — partner user guide
Version	1.0 — first issue
Preparation date	27 October 2026
Classification	For channel partners

02 Document Control

2.1 Purpose of this document

This guide explains how to use the MatrixIQ Partner Portal: how to send us an opportunity, follow it as our sales team works on it, request a demonstration for your customer, find and download quotations and marketing material, ask our marketing team for collateral, and raise after-sales support.

It is written so that you can use every part of the portal confidently without needing to call us — and so that you know, at each point, what we will do next and roughly when.

2.2 Version history

Version	Date	Issued by	Summary of change
1.0	27 October 2026	NANTA TECH LIMITED	First issue.

2.3 Ownership and approval

Role	Name	Responsibility
Document owner	To be confirmed	Keeps this guide accurate as the portal develops.
Approver	To be confirmed	Signs off each version before it is issued to partners.
Your first point of contact	Your relationship manager	Named for your company when your portal account was set up.
Review frequency	To be confirmed	—

2.4 Who this guide is for

- **Partner Admin** — the primary account for your company. Everything in this guide applies, including managing your colleagues' portal accounts.
- **Partner User** — a team member at your company. Everything applies except user management.

2.5 Scope and limitations

In scope. The seven areas of the Partner Portal, what you can do in each, and what happens on our side afterwards.

Out of scope. Commercial terms, your partner agreement, pricing policy, and anything our internal teams do that is not visible to you.

- What you see in the portal is specific to your partner company. Figures and lists in this guide are examples of *shape*, never of your actual data.

- Where a detail could not be confirmed at the time of writing, this guide says so rather than guessing. Those points are marked ***To be confirmed***.

03 Introduction

3.1 What the Partner Portal is

The Partner Portal is your own view of the work we are doing together. It is not a separate system holding a copy of your information — it is a window onto the very same records our sales, technical and marketing teams work in.

That matters in a practical way. When you submit an opportunity it enters our internal sales pipeline directly, so there is no re-keying, no delay while somebody copies it across, and no risk of the two versions disagreeing. When our team updates it, you see the change. When we share a quotation with you, it is the same document our team prepared.

3.2 What you can do

Send us business
`My Leads / Projects`
Submit a new opportunity on the full project form, attach supporting files, and follow it through our pipeline.

Get your customer a demo
`Demo Requests`
Request a demonstration, on site or online, and follow it to completion.

Work with pricing
`Quotations`
Read and download every quotation we have shared with you, with its versions and validity.

Find collateral
`Marketing Materials`
Browse and download the brochures, datasheets, case studies and presentations we publish for partners.

Ask for new collateral
`Marketing Requests`
Ask our marketing team for something specific, set a priority and a needed-by date, and download the finished files.

Get help after the sale
`Technical Support`
Raise a ticket, describe the product and site, and talk directly to the engineer handling it.

3.3 What you cannot do, and why

Not available in the portal	Why
Change a quotation.	A quotation is a formal document issued by us. You can read and download it as often as you like, but only our team can revise it. If something needs to change, ask — we will issue a new version.
Choose the technical person for a demonstration.	The salesperson assigned to your opportunity selects the right technical colleague, based on the product and their availability.
Edit a submitted opportunity at will.	Once it is with our sales team it is being worked on. You can edit it whenever we ask you for changes — see §6.4.
Mark your own support ticket as resolved.	Declaring a technical fix is an engineering statement. You confirm a fix by closing the ticket, or tell us it did not work by reopening it.
See other partners' information, or our internal records.	The portal shows your company's records only.

3.4 A note on how your records are kept separate

YOUR INFORMATION IS YOURS

Every screen in the portal is bound to your partner company. You see your own submissions, your own demonstrations, the quotations we have shared with you, your own marketing requests and your own support tickets — and nothing else.

The separation works in both directions: your portal account can only reach partner pages, and our internal staff cannot enter the Partner Portal at all. There is no "view as partner" mode. When a colleague of ours helps you with something, they are looking at the internal record, not at your screen.

04 Your Access and What It Covers

4.1 The two partner roles

Role	Who holds it	What it adds
Partner Admin	The primary account for your company	Everything a Partner User can do, **plus** managing your company's other portal accounts.
Partner User	Team members at your company	Full use of all seven areas. Cannot manage other accounts.

4.2 What each role can do in each area

Area	View	Create	Edit	Download
Dashboard	**Yes**	—	—	—
My Leads / Projects	**Yes**	**Yes**	When we ask	**Attachments**
Quotations	**Yes**	**No**	**No**	**Yes**
Demo Requests	**Yes**	**Yes**	***To be confirmed***	—
Marketing Materials	**Yes**	**No**	**No**	**Yes**
Marketing Requests	**Yes**	**Yes**	**No**	**Delivered files**
Technical Support	**Yes**	**Yes**	**Reply & confirm**	—
Portal user management	Partner Admin	Partner Admin	Partner Admin	—

4.3 Your company's account status

Your portal access depends on your partner company's account being **active**. Your Dashboard shows this at the top.

Status	What it means for you
Active	Normal. Everything in this guide is available.
Pending	Your account has been created but is not yet live. Contact your relationship manager.
Suspended	Access is paused. Contact your relationship manager.
Inactive	Access is closed. Contact your relationship manager.

Your company's status is checked each time you use the portal, so a change takes effect straight away rather than waiting for your next sign-in.

4.4 Mandatory access and security rules

PLEASE READ AND FOLLOW THESE — THEY ARE CONDITIONS OF YOUR PORTAL ACCESS

1. **Use your own account.** Every action is recorded against the person signed in. Sharing a login makes it impossible to tell who did what — which protects nobody, least of all you.
2. **Do not try to reach pages outside the portal.** Anything outside the partner area is for our internal staff. Attempting to reach it simply returns you to your Dashboard, and the attempt is recorded.
3. **You can only see what has been made available to your partner account.** If something you expect is missing, ask — do not assume it is a fault.
4. **You cannot revise a quotation we have shared.** Ask us for a revised version instead.
5. **Edit a submitted opportunity only when we have asked for changes.** That is the one circumstance in which editing is open.
6. **Treat downloaded material as confidential to your business relationship with us,** unless it is plainly intended for your customers — brochures, datasheets and case studies are.
7. **Tell us immediately** if you think an account has been compromised, or if a colleague leaves and their access should be removed.

05 Guide to the Seven Areas

The portal menu groups the seven areas into four sections. This is the whole of what the Partner Portal contains.

Section	Area	What it is for
—	**Dashboard**	Your submissions, demonstrations, quotations and support at a glance, and what is waiting on you.
Sales	**My Leads / Projects**	Submit a new opportunity and track every one you have sent us.
	Quotations	Quotations shared with you, with their versions and validity. Read and download only.
	Demo Requests	Request a product demonstration for your customer and follow it to completion.
Marketing	**Marketing Materials**	Brochures, datasheets, case studies and presentations published for partners.
	Marketing Requests	Ask our marketing team for collateral and track it to delivery.
Support	**Technical Support**	Raise and track after-sales support tickets.

5.1 Area summaries

Area	What you provide	What you get back
My Leads / Projects	Customer contact details, opportunity type, the teams involved, priority, expected closing date, approximate value, timeline, remarks and supporting files.	A tracked submission with a clear position in our pipeline, a conversation thread with our sales team, and quotations and demonstrations that follow from it.
Quotations	Nothing — we share these with you.	The quotation, its line items, its totals, its version history and validity, any note from our team, and a downloadable PDF.
Demo Requests	The project or quotation, client name, company, location, whether it is on site or online, the domains to be shown, your preferred date and time, priority, objective and notes.	A tracked demonstration request, a confirmed date once scheduled, and progress through to completion.
Marketing Materials	Nothing — we publish these.	A searchable library organised into folders, grouped by product and category, with everything openable and downloadable.

Area	What you provide	What you get back
Marketing Requests	A title, product category, collateral type, description, priority, needed-by date and any reference files.	A tracked request with a clear position, and the finished files to download once delivered.
Technical Support	Title, issue description, business impact, and where known the product, model or serial number, customer, site, contact and date the issue occurred.	A tracked ticket, a direct conversation with the assigned engineer, and a resolution record saying what was done and why it happened.

06 Step-by-Step Procedures

6.1 Signing in for the first time

1. We create your account and send a welcome e-mail containing your username and a one-time password.
2. Open the portal address in the e-mail and sign in with those details.
3. You are taken straight to a password-change screen. **You cannot use the portal until you set your own password.** This is deliberate — it means nobody at our end knows your password.
4. Choose a password you do not use anywhere else, and save it in your own password manager.
5. You arrive at your **Dashboard**.

> **IF THE WELCOME E-MAIL NEVER ARRIVES**
>
> Check your spam folder first. If it is genuinely missing, ask your relationship manager to resend it — there is a control on our side for exactly this. Please do not ask a colleague to share their login with you in the meantime.

6.2 Your Dashboard

The Dashboard is the first screen you see. It answers two questions: how is our joint business doing, and is anything waiting on me?

Panel	What it shows
Account status	Confirms your partner account is active.
Your activity	**Submitted** — how many opportunities you have sent us. **Awaiting review** — how many we have not yet decided on. **Active** — how many are live in our pipeline. **Win rate**. **Demos requested**.
Value	**Your estimates, all submissions** — the approximate values you entered. **Our value, accepted projects** — what we assess accepted opportunities at. **Won business**.
Submissions over the last 12 months	A month-by-month picture of what you have sent us.
Where to go	Shortcuts into the other areas.
What is waiting on you	Anything that needs your action — most often an opportunity where we have asked for more information, or a support ticket where we are waiting on your answer.

> **WHY YOUR ESTIMATE AND OUR VALUE CAN DIFFER**
>
> Your estimate is the figure you entered when you submitted. Our value is what we assess the opportunity at once we have scoped it. The two differing is normal — it is simply two readings of the same deal at different stages, and it is useful to see both.

SCREENSHOT PLACEHOLDER

[Insert screenshot: the Partner Portal Dashboard showing Your activity, Value and the 12-month submissions chart]

6.3 Submitting a new opportunity

Before you start

- Have the customer's contact details to hand.
- Know roughly which of our product lines the opportunity involves.
- Gather any supporting files — a requirement document, a floor plan, a tender notice, an e-mail trail.

Procedure

1. Open **Sales** → **My Leads / Projects** and select **Submit an opportunity**.
2. Enter the customer contact details:
   - **Client Representative Name** — the person at the customer you are dealing with.
   - **Company**, **Phone**, **Email**, **Address**.
   - **Alternate Contact Name (optional)** and **Alternate Contact Phone (optional)** — worth adding; it saves a chase later if the main contact is unavailable.
3. Describe the opportunity:
   - **Opportunity Type**.
   - **Department** — tick every team you think this deal involves. More than one is fine, and it is better to tick one too many than one too few; it decides who inside our business picks it up.
   - **Priority** — Medium or High.
   - **Expected closing date**.
   - **Approx. Project Price (₹)** — your best estimate. It does not commit you to anything.
   - **Expected timeline** — free text, for example *Q3 2026* or *within 2 months*.
   - **Remarks** — anything we should know. Competitive position, budget status, who the decision-maker is.
4. Attach your supporting files.
5. Select **Submit an opportunity**, or **Cancel** to abandon.

What happens next

- Your submission **enters our internal sales pipeline immediately** as a real project record, flagged as yours.
- Our sales team is notified and begins its review.
- Your submission appears in your list at **Awaiting sales review**.

> **A GOOD SUBMISSION GETS A FASTER ANSWER**
>
> The two things that most often slow a review down are a missing decision-maker and an unclear scope. Putting both in the **Remarks** field at the outset usually saves an entire round of questions.

SCREENSHOT PLACEHOLDER

[Insert screenshot: the Submit an opportunity form, showing contact details and the Department tick list]

6.4 Tracking a submission and answering questions

6.4.1 Reading where it has got to

Open **My Leads / Projects** and select a submission. A progress bar shows how far along our pipeline it is, together with a plain-language position.

What you see	What it means
BEFORE WE HAVE ACCEPTED IT	
Submitted	You have sent it; it has reached us.
Awaiting sales review	With our sales team for a decision.
Information requested	**Waiting on you.** We have asked a question — see §6.4.2.
Not taken forward	We are not proceeding. The reason is in the conversation thread.
ONCE ACCEPTED — THE LIVE PIPELINE	
Prospect	Accepted and in early work.
Demo / Qualified	A demonstration is arranged or has happened.
Quotation	A quotation has been prepared and shared.
Negotiation	Commercial discussion is under way.
Commit	The customer has committed.
OUTCOMES	
Won	The business is ours. Congratulations.
Lost	The opportunity did not convert.
On hold	Paused, usually by the customer.

> **THE POSITION REFLECTS THE FURTHEST EVIDENCE, NOT JUST A LABEL**
>
> If a quotation has been shared with you, the position shows *Quotation* even if the underlying stage has not been updated yet — because a shared quotation is harder evidence of progress than a field someone has not got round to changing. The same applies to a booked demonstration. You are seeing the most accurate reading we have.

6.4.2 When we ask for more information

1. Your Dashboard flags the submission as needing your action, and its position shows **Information requested**.

2. Open it and read our question in the conversation thread.
3. Reply in the thread. This is the normal way to answer.
4. If the answer means changing the submission itself — a corrected value, a different contact, an added department — **edit the submission**. This is the one circumstance in which editing is open.
5. Once we have what we need, we move it forward and the position changes.

> **EDITING IS ONLY OPEN WHILE WE HAVE ASKED FOR CHANGES**
>
> The edit option appears only while the submission is at **Information requested**. If you need a change at any other time, ask in the conversation thread and we will reopen it. Every change you make is recorded by name and date, which protects both of us.

6.4.3 The conversation thread

Each submission carries a single thread combining our decisions and your replies, in order. You will see entries such as *Submitted by partner*, *More information requested*, *Accepted by sales* and *Not taken forward*, with your own replies alongside. Our sales reviewer sees exactly the same thread, so nobody has to be told what was already asked.

> **KEEP THE CONVERSATION IN THE THREAD**
>
> An answer given by e-mail or over the phone is not attached to the record. Putting it in the thread means the next person who picks up the opportunity — at our end or yours — has the full history.

6.4.4 If we decline

A submission marked **Not taken forward** carries our reason in the thread. This is not necessarily final: if circumstances change — a budget is confirmed, a specification is clarified — tell us in the thread. A declined submission **can** be accepted later. An accepted one, however, stays accepted; if an accepted opportunity subsequently fails it is closed through the normal pipeline as *Lost* or *On hold*, not by retracting the acceptance.

6.5 Quotations

What this area contains

Every quotation our team has shared with you. Quotations are shared deliberately — a quotation only appears here once we have sent it to you.

Procedure

1. Open **Sales** → **Quotations**. The list is headed **Shared with you**.
2. Read the columns: **Quotation**, **Customer**, **Status**, **Total** and **Shared**.
3. Open one to see its detail:
   - Any **Note from our team** accompanying the share.
   - The line items — **Description**, **Rate** and **Amount**.
   - **Subtotal**, **Discount** and **Total**.
   - Its **version history** and **validity**.
4. Download the PDF. It carries our company header and terms, and is the document to forward to your customer.

READ AND DOWNLOAD ONLY — BY DESIGN

You cannot revise a quotation. If the scope, quantities, pricing or validity need to change, ask your relationship manager or reply on the related opportunity. We will prepare a revised version, and it will appear here as a new version alongside the original so the history stays intact.

CHECK THE VALIDITY BEFORE YOU FORWARD IT

Each quotation carries a validity window. A quotation past its validity may no longer reflect current pricing. If you are close to the date, ask us to confirm or reissue before sending it on.

6.6 Requesting a product demonstration

Before you start

- Agree a workable date and time with your customer first — and ideally a second option.
- Know whether it needs to be at the customer's site or can be done online.
- Know which of our product lines you want shown.

Procedure

1. Open **Sales** → **Demo Requests** and select **Request a demo**.
2. Link the **Project** and, where relevant, the **Quotation** the demonstration relates to.
3. Enter **Client name ***, **Company** and **Location**.
4. Choose **How is the demo given?**

Option	What it means
At the client's site — equipment is sent	We ship equipment to the site. This needs more lead time: the equipment has to be prepared, dispatched, demonstrated and returned.
Online — screen share, nothing shipped	Conducted remotely. Usually much quicker to arrange, as no equipment movement is involved.

5. Select the **Domain(s) demonstrated** — the product lines to be shown.
6. Enter the **Demo date & time *** you need, and a **Priority** — Medium or High.
7. Describe the **Demo objective** — what the customer needs to see in order to be convinced — and add any **Notes**.
8. Select **Request a demonstration**.

What happens next

- Your request reaches the salesperson assigned to your opportunity.
- **They select the technical colleague** who will give the demonstration, based on the product and availability. This is not something you choose.
- The request then goes through our internal technical and management approvals.
- For an on-site demonstration, our back office prepares and dispatches the equipment, and recovers it afterwards.

- You follow the whole thing from **Your requests**, which shows what you **Requested for** and the **Confirmed date** once one is agreed.

WHAT YOU WILL SEE AS IT PROGRESSES

Status	Meaning
Requested	Submitted; nobody has picked it up yet.
Under review	Being assessed internally — availability, products, timing.
Approved — being scheduled	Agreed. We are preparing. For an on-site demonstration this includes readying and sending equipment.
Scheduled	A date has been set. It appears as the confirmed date.
Completed	The demonstration has happened.
Cancelled	Not going ahead. The screen will say so.

> **WHY "APPROVED — BEING SCHEDULED" AND "SCHEDULED" ARE DIFFERENT**
>
> *Approved* means we have agreed to do it and are getting ready. *Scheduled* means a date is actually fixed. Please do not confirm a date to your customer until you see **Scheduled** with a confirmed date.

6.7 Marketing Materials

Everything in this area has been published for partners. If it is here, you may use it.

1. Open **Marketing** → **Marketing Materials**. The **Library** appears.
2. Browse the folder tree, or select **Open folder** to go into one. Documents are grouped by product and separated by category — datasheets, case studies, brochures, presentations, company profiles, certificates, and video and image assets.
3. Use **Search the library** to find something by name or description.
4. Open or download any document.

> **IF SOMETHING YOU NEED IS NOT THERE**
>
> The library holds what has been published for partners — not everything that exists. If you need a document you cannot find, raise a **Marketing Request** (§6.8) or ask your relationship manager. It may simply be that nobody has published it yet.

> **A NOTE ON LINKS**
>
> Some items open a document hosted elsewhere rather than downloading a file. If a link does not open for you, tell us — it usually means a permission needs adjusting at our end, not that you have done anything wrong.

6.8 Requesting marketing collateral

You use the same request form our own teams use.

1. Open **Marketing** → **Marketing Requests** and start a new request.

2. Enter a **title**, choose the **product category**, and choose the **collateral type** — brochure or flyer, social media post, banner or standee design, video or reel, e-mail campaign, website update, product photography, event collateral, or other.
3. Write the **description of requirement**. Say who the audience is, what format or size you need, where it will be used, and anything that must not change.
4. Set the **priority** and the **needed-by date**:

Priority	Signals
Urgent	Needed within a day or two.
High	Needed this week.
Medium	Needed in the next couple of weeks.
Low	No rush.

5. Attach any reference files — an existing piece you want it to resemble is the single most useful thing you can provide.
6. Submit.

Tracking it

Status	Meaning
Submitted	Received and being considered.
In progress	Our marketing team is working on it.
In review	Being checked before release. This is routine, not a problem.
Completed	Finished. The files are available to download.
Not proceeding	We are not taking it forward. The reason is shown.

The request screen shows **Request details**, your **Description of requirement** and **Additional information**, **Your attachments** with an **Open attachment** link, and — once finished — **Delivered by Marketing** with a **Download** control for each file. A progress indicator shows how far along it is.

> **FINISHED FILES APPEAR ONLY WHEN THE WORK IS FINISHED**
>
> Nothing appears under *Delivered by Marketing* until the request is Completed. This is deliberate: a work-in-progress draft reaching you would be easy to mistake for the final artwork.

> **IF THE REQUEST NEEDS SOMETHING FROM YOU**
>
> Occasionally our team needs an answer before they can continue. When that happens the request is flagged as **needing your action** on your Dashboard. Please answer promptly — the work is genuinely stopped until you do.

6.9 Raising a technical support ticket

Before you start

- Gather the product and, if you can, its model or serial number.
- Know the site and the contact person there.
- Be ready to describe what is actually happening, not only what you think the cause is.

Procedure

1. Open **Support → Technical Support** and select **Raise a support ticket**.
2. Enter a **Title *** — a short summary of the problem.
3. Choose the **Issue type**.
4. Choose the **Business impact**. This is the most important field on the form, because it sets how quickly we must respond:

Business impact	We respond within	We aim to resolve within
Critical — system down	30 minutes	4 hours
High — major function unusable	2 hours	8 hours
Medium — partially impaired	4 hours	24 hours
Low — minor inconvenience	8 hours	72 hours

5. Link the **Related project** where there is one. This connects the ticket to the original deal and quotation and saves us asking.
6. Record what you know about the installation: **Product**, **Model / serial number**, **Date the issue occurred**, **Customer**, **Installation site** and **Contact person**.
7. Complete **Describe the issue ***. Include what happens, when it started, whether it is constant or intermittent, and anything already tried.
8. Submit.

> **PLEASE SET THE BUSINESS IMPACT HONESTLY**
>
> These targets are real commitments we measure ourselves against. Marking a minor inconvenience as *Critical* pulls engineers away from genuinely failed systems. If something is genuinely down, do mark it Critical — that is what the level is for.

Working the ticket with us

1. We triage the ticket and assign an engineer.
2. The engineer posts a first reply in the **conversation**. Reply in the same thread — it keeps everything in one place.
3. If we need something from you, the ticket moves to **Awaiting your information** and is flagged on your Dashboard. **Replying moves it straight back to us**, so your answer is all that is needed.
4. When the engineer believes it is fixed, the ticket moves to **Resolved**, with **What we did** and the **Root cause** recorded.

5. **You then decide.** If it is genuinely fixed, close the ticket. If it is not, reopen it and say why — it goes straight back to the engineer.

> **WHY YOU CLOSE THE TICKET, NOT US**
>
> Only you can confirm a problem has actually gone away at your customer's site. An engineer cannot close a ticket, precisely so that "closed" means the customer agreed — not that we decided we were finished. Closing promptly when something is fixed genuinely helps; so does reopening when it is not.

THE STATUSES YOU WILL SEE

Status	Meaning
Open	We have the ticket; work has not started yet.
In progress	An engineer is working on it.
Awaiting your information	**Waiting on you.** Reply and it returns to us.
Escalated	Raised internally for more authority or expertise.
Resolved	We believe it is fixed. **Your turn** — close it, or reopen it.
Reopened	You told us it was not fixed. Back with the engineer.
Closed	Confirmed complete.
Cancelled	Not being taken forward.

SCREENSHOT PLACEHOLDER

6.10 Managing your company's portal users

Partner Admin only.

1. Open your company's portal users area.
2. To add a colleague, create an account with their name and e-mail address. They receive a welcome message with a one-time password and must set their own password on first use, exactly as you did.
3. To remove access — when a colleague leaves, or changes role — deactivate their account. **Do this promptly.**
4. Review your company's portal users periodically and remove anyone who no longer needs access.

> **THIS IS YOUR RESPONSIBILITY, NOT OURS**
>
> We cannot know when someone at your company leaves. Keeping your portal user list current is the single most effective thing you can do to protect your own customer information.

IF YOU CANNOT FIND THIS AREA

Only the **Partner Admin** account can manage users. If you believe you hold that role and cannot see the option, contact your relationship manager. The exact location of this area in the menu is ***To be confirmed***.

07 Workflows — What Happens After You Submit

These diagrams show what happens on our side, so you know what to expect and roughly when.

7.1 An opportunity you submit

1 **Submitted** — You → 2 **Awaiting sales review** — Our sales team → 3 **Accepted** — Enters the pipeline

BRANCH **Information requested**

Waiting on: you · **What to do:** reply in the thread, and edit the submission if the answer changes it.

> **Then:** we accept it, or decline it.

↓

BRANCH **Not taken forward**

Reason: given in the conversation thread.

> **Not necessarily final** — if circumstances change, tell us in the thread. A declined submission can still be accepted later.

↓

AFTER ACCEPTANCE **The live pipeline**

Prospect → Demo / Qualified → Quotation → Negotiation → Commit → **Won**. Or Lost, or On hold.

> **Acceptance is not reversed.** An accepted opportunity that does not convert is closed as Lost or On hold — so the work already done against it is never stranded.

7.2 A demonstration you request

STEP 1 **You request it**

You provide: client, location, on-site or online, domains, date and time, objective.

↓

STEP 2 **Your salesperson picks it up**

They: select the technical colleague and submit it for approval. **This is why a demo is not instant** — and why the technical person is not your choice.

↓

STEP 3 **Internal approvals**

Technical availability is confirmed, then a manager approves.

↓

STEP 4 **Preparation**

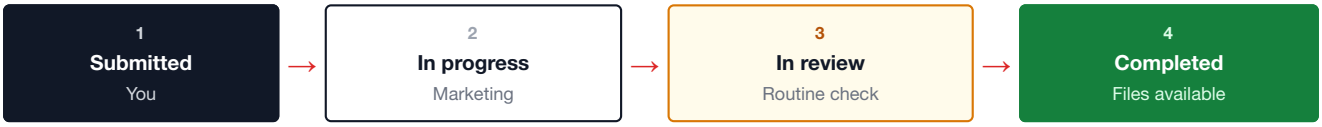

On site: equipment is prepared, dispatched and later recovered — allow more lead time.
Online: nothing is shipped; it simply waits for its date.

↓

STEP 5 **Scheduled → Completed**

Confirm the date to your customer only once you see *Scheduled*.

7.3 A marketing request

BRANCH **Needs your input**

Flagged on your Dashboard. The work is stopped until you reply.

BRANCH **Not proceeding**

We are not taking it forward. The reason is shown on the request.

7.4 A support ticket

STEP 1 **You raise it**

Sets: the business impact, and therefore our response and resolution targets.

STEP 2 **We triage and assign**

An engineer takes ownership and posts a first reply within the response target.

STEP 3 **We work it**

You can follow the conversation throughout.

> **Awaiting your information** — replying returns it to us immediately. **Time spent waiting on you does not count against our resolution target**, which is why we use this status rather than leaving it open.

STEP 4 **Resolved**

We record what we did and why it happened.

STEP 5 **You close it — or reopen it**

Closing confirms the fix. **Reopening** sends it straight back, with your reason.

7.5 What is automatic and what needs a person

Event	Automatic?	Who acts
Your submission entering our sales pipeline	**Automatic**	—
Your tracking position updating as we work	**Automatic**	—

Event	Automatic?	Who acts
Finished marketing files becoming available at completion	**Automatic**	—
Your support ticket returning to us when you reply	**Automatic**	—
Deciding your submission	**Manual**	Our sales team
Choosing the technical person for a demonstration	**Manual**	Your assigned salesperson
Sharing a quotation with you	**Manual**	Our sales team
Answering a question we have asked	**Manual**	**You**
Closing or reopening a resolved ticket	**Manual**	**You**

08 Field and Status Reference

8.1 Opportunity submission fields

Field	Required	Notes
Client Representative Name	***To be confirmed***	Your contact at the customer.
Company	***To be confirmed***	The customer organisation.
Phone, Email, Address	***To be confirmed***	Customer contact details.
Alternate Contact Name / Phone	Optional	Labelled optional. Worth completing.
Opportunity Type	***To be confirmed***	—
Department	***To be confirmed***	Tick every team the deal involves. Decides who picks it up.
Priority	***To be confirmed***	Medium or High.
Expected closing date	***To be confirmed***	—
Approx. Project Price (₹)	***To be confirmed***	Your estimate. Not a commitment.
Expected timeline	Optional	Free text — for example *Q3 2026*.
Remarks	Optional	The most useful field on the form.
Attachments	Optional	Supporting documents.

Fields shown as not confirmed appear on the form; whether the portal refuses to submit without them was not confirmed at the time of writing. The form will tell you if something is missing.

8.2 Your submission's position

Position	On the progress bar?	Meaning
Submitted	**Yes**	Received.
Awaiting sales review	**Yes**	With our sales team.
Information requested	**Shown as a status**	**Waiting on you.**
Prospect	**Yes**	Accepted, early work.
Demo / Qualified	**Yes**	A demonstration is arranged or done.
Quotation	**Yes**	A quotation has been prepared and shared.
Negotiation	**Yes**	Commercial discussion.
Commit	**Yes**	The customer has committed.
Won / Lost / On hold	**Shown as a status**	Outcomes. A progress bar is not shown for these.

Position	On the progress bar?	Meaning
Not taken forward	**Shown as a status**	Declined, with a reason in the thread.

8.3 Demonstration request fields

Field	Required	Notes
Project	***To be confirmed***	The opportunity the demonstration relates to.
Quotation	Optional	Where one exists.
Client name	Required	—
Company, Location	***To be confirmed***	—
How is the demo given?	Required	At the client's site, or online.
Domain(s) demonstrated	***To be confirmed***	The product lines to show.
Demo date & time	Required	Your requested slot.
Priority	***To be confirmed***	Medium or High.
Demo objective, Notes	Optional	What the customer needs to see.

8.4 Support ticket fields

Field	Required	Notes
Title	Required	A short summary.
Describe the issue	Required	What happens, when it started, what has been tried.
Issue type	Optional	—
Business impact	Defaults to Medium	**Sets our response and resolution targets.**
Related project	Optional	Connects the ticket to the original deal and quotation.
Product, Model / serial number	Optional	Give these wherever you can — they speed diagnosis considerably.
Date the issue occurred	Optional	—
Customer, Installation site, Contact person	Optional	Who the engineer should speak to on site.

8.5 Marketing request fields

Title, product category, collateral type, description of requirement, additional information, priority, needed-by date, and attachments. The description and the attachments do most of the work — see §6.8.

09 Downloads and Documents

Document	Where	Notes
Quotation PDF	Quotations	Carries our company header and terms. The document to forward to your customer. Check its validity first.
Marketing collateral	Marketing Materials	Brochures, datasheets, case studies, presentations, company profiles, certificates, video and image assets. Published for partners.
Delivered marketing files	Marketing Requests	Available under *Delivered by Marketing* once the request is Completed.
Your own attachments	Projects, Marketing Requests	Whatever you uploaded, available to open again.

9.1 Searching and filtering

- **Marketing Materials** — search by name or description, browse the folder tree, or filter by category and product.
- **My Leads / Projects**, **Quotations**, **Demo Requests** and **Technical Support** each list your own records, with status visible on every row.

9.2 Interpreting what you download

- A quotation shows a **subtotal**, any **discount** and a **total**, with each line item's description, rate and amount. It shows the price to you; it does not show our internal cost structure.
- A quotation past its **validity** may no longer reflect current pricing. Ask us to reissue rather than sending an expired one.
- Where a quotation has several **versions**, make sure you are sending the latest.

10 Notifications and Follow-Ups

10.1 What you will be told

Event	What you should do
We ask for more information on a submission	**Reply in the thread**, and edit the submission if the answer changes it. The work is stopped until you do.
We accept or decline a submission	Read the decision and any reason in the thread.
A quotation is shared with you	Open it, check the validity, and forward it to your customer.
Your demonstration request progresses	Watch for **Scheduled** and the confirmed date before committing to your customer.
A marketing request needs your input	Answer promptly — the work is stopped.
A marketing request is completed	Download the files from *Delivered by Marketing*.
An engineer replies on a support ticket	Read it and reply in the same thread.
A support ticket is marked **Awaiting your information**	**Reply.** That alone returns it to us.
A support ticket is marked **Resolved**	**Close it** if the fix works, or **reopen it** with your reason if it does not.

10.2 Where to look

Notifications appear in the bell in the portal header, and — where e-mail is configured — by e-mail as well.

> **THE DASHBOARD IS THE RELIABLE LIST**
>
> E-mail can be delayed or filtered. The **what is waiting on you** area of your Dashboard is the authoritative list of anything needing your action. Make it a habit to check it when you sign in.

10.3 Our service targets

Area	Target
Technical support — first response	30 minutes (Critical), 2 hours (High), 4 hours (Medium), 8 hours (Low).
Technical support — resolution	4 hours (Critical), 8 hours (High), 24 hours (Medium), 72 hours (Low). Time spent waiting on your answer does not count.
Opportunity review	No published target. ***To be confirmed.*** Chase through your relationship manager if a submission sits unreviewed.
Demonstration scheduling	No published target. ***To be confirmed.*** On-site demonstrations need more lead time than online ones.

Area	Target
Marketing requests	Set by the priority you choose and agreed internally. Your needed-by date is taken into account.

11 Common Problems and Troubleshooting

Problem	Likely cause	What to do	Who to ask
You cannot sign in.	Wrong password, or your company's account is not active.	Use the password reset. If that does not help, check your Dashboard message or contact us.	Relationship manager
You are asked to change your password immediately.	Normal on first sign-in, or after a reset.	Set your own password. You cannot use the portal until you do.	—
A page returns you to your Dashboard.	You followed a link to a page outside the Partner Portal.	Use the portal menu. Pages outside it are for our internal staff.	—
Your submission has not been reviewed.	It may be in a queue, or it may be at *Information requested* and waiting on you.	Check the position first. If it genuinely sits at *Awaiting sales review*, chase us.	Relationship manager
You cannot edit a submission.	Editing is open only while we have asked for changes.	Ask in the conversation thread and we will reopen it.	Sales team, in the thread
A quotation has the wrong price or scope.	Something changed after it was prepared.	Ask for a revised version. You cannot change it yourself — a new version will appear here.	Relationship manager
A quotation is out of date.	Its validity window has passed.	Ask us to confirm or reissue before sending it to your customer.	Relationship manager
A demonstration has no confirmed date.	It is still being approved or prepared internally.	Watch for **Scheduled**. Do not promise your customer a date before then.	Relationship manager
An on-site demonstration is taking longer to arrange than expected.	Equipment has to be prepared, dispatched and later recovered.	Allow more lead time, or ask whether an online demonstration would serve.	Relationship manager
A document is missing from the library.	It may not have been published for partners.	Search first, then raise a Marketing Request or ask us.	Relationship manager
A document link does not open.	A permission may need adjusting at our end.	Tell us which document. It is not something you have done wrong.	Relationship manager
A marketing request seems stalled.	It may need your input, or be in routine review.	Check your Dashboard for an action flag, then the request's status.	Relationship manager
A support ticket has had no reply.	It may be at *Awaiting your information*, which means we are waiting on you.	Check the status. If it is genuinely with us and past the response target, escalate.	Relationship manager
You cannot mark a ticket resolved.	Only an engineer can declare a fix.	If it is fixed, **close** the resolved ticket. If not, **reopen** it.	—
A ticket was closed but the problem is back.	The fix did not hold, or it is a new occurrence.	Reopen the ticket rather than raising a new one — the history helps the engineer.	—

Problem	Likely cause	What to do	Who to ask
A colleague needs portal access.	No account yet.	Your Partner Admin creates one. If you have no Partner Admin, contact us.	Your Partner Admin
A colleague has left your company.	Their account is still active.	**Deactivate it immediately.** This is your responsibility.	Your Partner Admin
You see something that does not look like your data.	Should not happen.	**Tell us immediately** with a description of what you saw.	Relationship manager

12 Best Practice and Account Security

12.1 Rules the portal enforces

Rule	What you will see
You must set your own password before using the portal.	You are held at the password-change screen.
You can only reach Partner Portal pages.	Anything else returns you to your Dashboard.
You see only your own partner company's records.	Enforced on every screen.
You cannot revise a quotation.	No edit option is offered.
Only quotations we have finalised can be shared with you.	Drafts never appear.
You can edit a submission only while we have asked for changes.	The edit option appears only then, and every change is recorded by name.
You cannot declare a support ticket resolved.	You can close a resolved ticket, or reopen it.
Delivered marketing files appear only once the request is complete.	Nothing is shown before then.
Your company's account status is checked on every use.	A suspension takes effect immediately.

12.2 Recommended practice

Getting good answers quickly

- Submit opportunities early, even when details are incomplete — an early submission with remarks beats a perfect one three weeks later.
- Name the decision-maker and the budget position in **Remarks**. These are the two things we most often have to ask about.
- Tick every department the deal might involve. Too few means the right team never sees it.
- Reply promptly when something is flagged as waiting on you. Nothing moves until you do.

Accurate information

- Give a realistic approximate value. It is an estimate, not a commitment, and an honest one helps us prioritise properly.
- Use the business-impact levels honestly on support tickets.
- Always include the model or serial number when you have it. It is the single most useful field on a support ticket.
- Agree a date with your customer *before* requesting a demonstration, and offer an alternative.

Keeping everything in one place

- Use the conversation threads rather than e-mail or phone for anything that matters. A conversation attached to the record is visible to whoever picks it up next.
- Attach documents at submission rather than sending them separately.

- Close resolved tickets when the fix works, and reopen them when it does not. Both are genuinely useful to us.

Avoiding duplicates

- Check your existing submissions before adding a new one for the same customer.
- Search Marketing Materials before raising a marketing request — it may already exist.
- Reopen an existing ticket for a recurrence rather than raising a second one.

Account security — your responsibilities

- **One account per person.** Never share a login, even within your own team.
- **Use a unique password,** stored in a password manager rather than written down or reused.
- **Sign out on shared or public computers.**
- **Remove access promptly** when a colleague leaves. We cannot know when that happens.
- **Review your portal users periodically** — quarterly is a sensible rhythm.
- **Report anything suspicious immediately,** including a compromised account or data you did not expect to see.

Handling what you download

- Brochures, datasheets, case studies and presentations are published for you to use with your customers.
- Quotations are specific to one customer and one opportunity. Do not reuse one for another customer.
- Treat everything else as confidential to your business relationship with us.

13 Quick Reference

13.1 Frequently performed tasks

Send us an opportunity

My Leads / Projects → **Submit an opportunity** → customer details, departments, priority, value, remarks → attach files → submit.

Answer a question we asked

Open the submission → read the thread → reply → edit the submission if the answer changes it.

Get a quotation for your customer

Quotations → open it → check the validity → download the PDF.

Book a demonstration

Demo Requests → **Request a demo** → on site or online → domains, date, objective → submit. Wait for **Scheduled**.

Find a brochure or datasheet

Marketing Materials → search, or browse the folder tree → open or download.

Ask for new collateral

Marketing Requests → title, category, type, description, priority, needed-by date → attach a reference → submit.

Report a fault

Technical Support → **Raise a support ticket** → set the business impact honestly → product and serial → describe the issue.

Confirm a fix

Open the *Resolved* ticket → **close** it if fixed, or **reopen** it with your reason.

13.2 Statuses at a glance

Area	Positions you will see
My Leads / Projects	Submitted → Awaiting sales review → Prospect → Demo / Qualified → Quotation → Negotiation → Commit → Won Plus Information requested, Not taken forward, Lost, On hold.
Demo Requests	Requested → Under review → Approved — being scheduled → Scheduled → Completed Plus Cancelled.
Marketing Requests	Submitted → In progress → In review → Completed Plus Not proceeding.
Technical Support	Open → In progress → Resolved → Closed Plus Awaiting your information, Escalated, Reopened, Cancelled.

13.3 When something is waiting on you

You see	Do this
Submission at **Information requested**	Reply in the thread; edit the submission if needed.
Marketing request flagged as needing input	Answer the question on the request.

You see	Do this
Support ticket at **Awaiting your information**	Reply. That alone returns it to us.
Support ticket at **Resolved**	Close it, or reopen it with your reason.

13.4 Who to contact

About	Contact
An opportunity, a quotation, a demonstration	Your relationship manager, or reply in the record's own thread.
A marketing request or missing collateral	The marketing request itself, or your relationship manager.
A technical fault	Raise a support ticket; then use the ticket conversation.
Portal access for a colleague	Your Partner Admin.
Your company's account status, or a security concern	Your relationship manager, immediately.

14 Glossary and Appendix

14.1 Glossary

Business impact

How badly a fault affects the customer. It sets our response and resolution targets, so choose it honestly.

Collateral

Marketing material — brochures, datasheets, case studies, presentations, banners and similar.

Conversation thread

The record of messages attached to a submission, a request or a ticket. Both sides read the same thread.

Dashboard

Your home screen, showing activity, value and anything waiting on you.

Demonstration mode

Whether a demo is given at the customer's site, with equipment shipped, or online with nothing shipped.

Information requested

The position a submission takes when we have asked you a question. The one circumstance in which you may edit it.

Opportunity

A potential piece of business you submit to us. Once accepted it becomes a project in our pipeline.

Partner Admin

The primary portal account for your company. Also manages your company's other portal users.

Partner User

A portal account for a team member at your company.

Pipeline

The sequence an accepted opportunity moves through: Prospect, Demo / Qualified, Quotation, Negotiation, Commit, then Won or Lost.

Relationship manager

The person at our company assigned to your partner account. Your first point of contact.

Resolution target

The time within which we aim to resolve a ticket of a given business impact. Time spent waiting on your answer is not counted.

Response target

The time within which an engineer will post a first substantive reply.

Validity

The period for which a quotation's pricing holds good.

Version (quotation)

A revision of a quotation. Earlier versions remain visible so the history is intact.

14.2 Appendix A — Opportunity submission checklist

☐	Check
☐	Customer contact name, company, phone, e-mail and address are complete.
☐	An alternate contact has been added.
☐	Every department the deal might involve is ticked.
☐	The approximate value is a realistic estimate.
☐	The expected closing date and timeline are stated.
☐	Remarks name the decision-maker and the budget position.
☐	Supporting documents are attached.
☐	You have checked you are not duplicating an existing submission.

14.3 Appendix B — Support ticket checklist

☐	Check
☐	The title summarises the problem in a line.
☐	The business impact reflects the real effect on the customer.
☐	Product and model or serial number are recorded.
☐	Installation site and on-site contact person are given.
☐	The description says what happens, when it started, and whether it is constant or intermittent.
☐	Anything already tried is noted.
☐	The related project is linked.
☐	You have checked whether an existing ticket covers the same fault.

14.4 Appendix C — What happens on our side

When you…	We…
Submit an opportunity	Receive it directly into our sales pipeline, review it, and either accept it, decline it with a reason, or ask you a question.
Reply to an information request	Read your reply in the same thread and move the submission forward.
Request a demonstration	Have your salesperson select a technical colleague, confirm their availability, obtain management approval, and — for an on-site demonstration — prepare, ship and later recover the equipment.

When you…	We…
Receive a quotation	Have prepared it against your opportunity and shared it deliberately, with its versions and validity.
Request marketing collateral	Review it, commit a delivery date, assign a marketing colleague, check the technical content, and deliver the finished files.
Raise a support ticket	Triage it, set targets from the business impact, assign an engineer, and work it with you until you confirm the fix.

14.5 Appendix D — Points to be confirmed

Point	Status
Exactly which fields the opportunity and demonstration forms refuse to submit without	***To be confirmed*** — the form will tell you if something is missing.
Whether a demonstration request can be edited after submission	***To be confirmed***
Where portal user management appears in the menu for a Partner Admin	***To be confirmed***
Published turnaround targets for opportunity review and demonstration scheduling	***To be confirmed***
Document owner, approver and review frequency for this guide	***To be confirmed***

END OF DOCUMENT — MATRIXIQ PARTNER PORTAL SOP, VERSION 1.0
